

## Acknowledgments

Every large project needs help from many individuals for its successful completion, and this book is no different. The *Encyclopedia of Virtual Communities and Technologies* is perhaps the largest creative and administrative undertaking of my professional career. In the paragraphs that follow, I would like to take this opportunity to acknowledge individuals and organizations who made this book possible.

First, I would like to thank my wife, Anju, and my son, Rudra for their support and patience while I worked on this encyclopedia for over a year. I would also like to thank my parents for their constant encouragement.

Second, I would like to acknowledge the invaluable help provided to me by my graduate assistants and doctoral students especially Rinku Sreedhar, Li Xiao, Deidra Fryer and Harmandeep Ahuja. I would also like to thank undergraduate students Sneha and Aditi for their help. These students assisted me in managing the review process that included over 150 articles.

Third, I would like to thank all researchers in the area of virtual communities who decided to contribute to this encyclopedia. Their articles have made this encyclopedia a significant contribution to the literature in this area. Moreover, a number of authors also served as reviewers for submitted articles. I appreciate their help in determining that only papers of the highest quality were accepted for this publication.

Next, I would like to thank Renée Davis and Mehdi Khosrow-Pour who prodded me with emails and phone calls to keep the project on schedule. I have to admit that this encyclopedia would have remained incomplete without their constant reminders.

Finally, I would like to thank the administrative staff in the Management Science Department at George Washington University. The departmental staff that included Michelle Ledesma-Borowski, Tatyana Kuzina and Sergio D'Onofrio helped me put my packages together to send to the Idea Group headquarters in Hershey, PA, USA.

Once again, I would like to thank everyone who has directly or indirectly contributed to this encyclopedia.

*Subhasish Dasgupta, PhD*  
*Associate Professor of Information Systems*  
*George Washington University, Washington, DC, USA*
