

Acknowledgment

I dedicate this to my family. Your love and patience made this possible.

Sorin Gudea

None of this would have been possible without the help of many, many people. It is only natural to extend my heartfelt gratitude and appreciation to all those who were at my side during the long journey that got me where I am today.

I would like to acknowledge the help of all involved in the review process of the book, without whose support the project could not have been satisfactorily completed.

Thanks go to all those who provided constructive and comprehensive reviews. Some of the reviewers must be mentioned as their reviews were instrumental in improving the manuscript submitted for publication. Reviewers who provided the most comprehensive, critical, and constructive comments include: Craig Van Slyke, of University of Central Florida; Terry Ryan, of Claremont Graduate University; and professor Anthony Tebelskis. Support of the School of Information Systems and Technology at Claremont Graduate University is acknowledged.

Special thanks also go to the publishing team at IGI Global whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular to Kristin Roth, who continuously prodded via e-mail for keeping the project on schedule and to Jan Travers, whose enthusiasm motivated me to take on this project. The assistance of Deborah Yahnke is acknowledged.

The teachers who shared their experiences deserve credit. Although you must remain anonymous, I am very grateful for the time you spent answering questions and helping this research unfold.

I would also like to thank Dr. Lorne Olfman and Dr. Tom Horan, of Claremont Graduate University, who read an early draft of the manuscript and provided helpful suggestions for enhancing its content. And last but not least, my family, for your unfailing support and encouragement during the months it took to give birth to this book. Special thanks to Rodica Gudea for her tireless editing of the manuscript.

My mentor, Professor Terry Ryan from Claremont Graduate University, deserves special recognition. Terry was instrumental in more ways than I can think of in the writing of this book. Without his constant encouragement and enthusiasm, I would have never embarked on this journey, and this book would not have been offered to you today. My deepest gratitude goes to him.
