

Acknowledgments

This book would not have been possible without the cooperation and assistance of many people: the authors, reviewers, our colleagues, and the staff at Idea Group Inc. The editors would like to thank Mehdi Khosrow-Pour for inviting us to produce this book, Jan Travers for managing this project, and Michele Rossi as development editor for answering our questions and keeping us on schedule. Many of the authors of chapters in this book also served as reviewers of other chapters, and so we are doubly appreciative of their contributions. We also acknowledge our respective universities for affording us the time to work on this project and our colleagues and students for many stimulating discussions and Fash for all his efforts with formatting draft versions of the manuscript. Finally, the authors naturally wish to acknowledge their families for providing time and supporting them throughout this project.
