

Acknowledgment

The authors would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed.

In particular, we would like to thank all the members of the CLMS team in Athens that assisted us with the preparation of Chapters V, VII, and the case study of Chapter IX.

The three anonymous reviewers of the book, for their invaluable comments and suggestions during the preparation of the draft manuscripts.

Finally, in no particular order, the authors would like to acknowledge organizations and committees such as the World Wide Web Consortium (W3C), Object Management Group Inc (OMG), Organization for the Advancement of Structured Information Standards (OASIS), IBM Alphaworks, European Semantic Systems Initiative (ESSI), and many others, for their excellent Web resources on the standards and technologies investigated by the book.

Last but not least, our thanks go to the publishing team of IGI Global, whose contributions throughout the whole process, from inception of the original idea to final publication have been excellent and most helpful.

Bill Karakostas and Yannis Zorgios
