

Acknowledgments

I would like to thank everyone who contributed to making this book possible. The enthusiasm from the reviewers is acknowledged. I extend my gratitude and appreciation to this seemingly tireless group of academics. The review results were sent to each primary chapter author as constructive recommendations to improve their work. This type of supportive collegial environment continues my goal to promote the best quality research and project findings into the future. To the countless number of proofreaders, your scholarly efforts are appreciated by experienced academics as well as those new to this type of dissemination. To those authors of the chapters not selected for publication, please know that your efforts are acknowledged with thankfulness; selection decisions were most difficult, with topic coverage dictating final acceptance.

I would also like to express gratitude to RMIT University, which provided me with time away from School duties to complete the book. To the staff at Idea Group Inc., thank you for the continued professional advice that was always forthcoming and timely throughout the yearlong preparation process. A special word of appreciation is to be sent to Ramesh C. Sharma, Regional Director, Indira Gandhi National Open University, Haryana, India, for his encouragement with the early concept to bring forward this manuscript.
