A

- “actor-network theory” (ANT) 217
- abstraction 291
- abstraction-emergence loop 293, 298
- AFM: An Implementation of Agent Feedback Messaging 93
- agent
 - coordination 158, 167, 171
 - proxy 158, 163, 167, 171
- agent, and its environment 210
- agent, description of 69
- agent-based modelers 341
- agent-based modeling and simulation (ABMS) 344
- agent-based social simulation (ABSS) 54
- agent-based social simulation systems 51
- agent’s emotive state 199
- agent behaviors 17
- agent coding, reducing 89
- Agent Communication Language (ACL) 2
- agent communication languages 1
- agent communications, and the principle of feedback 85
- agent design 330
 - call stack 92
 - four questions 92
 - methodology 92
 - thread space 92
- agent design methodology 92
- Agent Feedback Messaging 85
- agent messaging
 - asynchronously 86
 - broadcast 86
 - FIFO queues 92
 - fire and forget 92
 - rules 86
 - synchronous 86
- agents, human-like 66
- agent socialization 331
- agent training 333
- aggressive behaviour 128
- ambiguity 160, 163, 164
- ambiguity detection 163
- animal behavior 36
- anti-bullying 229
- anti-bullying interventions 229
- anti-bullying interventions, current 130
- anti-bullying virtual learning environments 131
- artificial agent, interfacing the human and the 206
- artificial intelligence (AI) 308
- artificial life (ALife) 289
- aspects of cognition, and their associated orders of emergence 26
- assumed effects (AEs) 55
- asymmetry, threat or escape 254
- augmented reality (AR) 163
- auto-mirroring 280
- autonomy 159, 171
 - adjustable 159, 160, 170

B

- behaviour, when does culture influence 244
- belief promulgation 70
- belief propagation, temporal variance of 261

Index

biosimulation 94
 blood stream 86
 homeostasis 86
 nutrients 86
 organs 86
brain, default mode of the 279
bullying, direct physical 129
bullying, direct verbal 129
bullying, indirect (or relational) 129
bullying, in schools 128
bullying roles, as a group process 129
business to business (B2B) 62, 63
business to consumers (B2C) 62

C

C-SoNeS 230
CASE (Cognitive Agents for Social Environments) 104
cellular automata (CA) 289
cheatingr 251
Classroom Discussion Forums' (CDFs) 237
clustering 160
 conceptual 161
 feature maps 160
 semi-supervised 160
clustering, of conflicting goal states 160
code dependencies 91
Cognitive Agency and Robotics Laboratory (CARoL) 217
cognitive Semantics, six tenets 140
communicating, comprehending, and integrating (CCI) agents 55
complex adaptive systems (CAS) 342
complexity 292
constrained generating procedures (cgp) 290
continuous interaction 74
Continuous Model 76
Conway, John 69, 289
Conway Model 72
Conway Model, brief overview of the 72
coordination proxies 158
CORBA 93
credit assignment 163, 165
 complementary 160, 165, 170, 171

D

Damasian frameworks 201
Default-Logic (D-L) Framework 305, 306
Default-Logic Framework, syntax, ontology, and Semantics of the 309
Default-Logic Framework, using the to model two legal reasoning structures 313
dependencies, management and control of 92
dependency issues, and their management 90
Derby database 269
design principles, for building "understanding" agents 146
detail, levels and ranges of 294
direct reciprocity 255
discrimination trees and prototypes 143
dual-route neural networks 144

E

e-business 61
e-business, metrics and measurements in 67
e-CIRCUS project 230, 238
e-CIRCUS project consortium 126
electroencephalography (EEG) 276
ELIZA 38
emergence 290
emergence, concept of 21
emergence, five orders of 22
emergence, implications for 29
emergence, orders of 21
emergence, prediction and control of 297
emergence of recursive communication systems 195
emergence of social classes 173
emergence paradigm 2, 4, 5
emergence paradigm, the 4
emergent properties, of multi-agent communication 69
emergent social structures 17
emotion-based agent 206
emotionally aware framework 199
emotive output selector 209
engagement-oriented considerations 231
ephemeral emergents, level C 5
European Union funded project titled Emergence in the Loop (EMIL) 18

Expert controller 208
 Expressivator 234
 extensible markup language (XML) 63

F

FearNot! 132, 134, 230, 238
 FearNot! (Fun with Empathic Agents to achieve
 Novel Outcomes in Teaching) 132
 federated agent communications 94
 FIPA Interface Definition Lanaguage (IDL) 93
 fronto-parietal MNS 276
 functional magnetic resonance imaging (fMRI)
 276, 277
 Fusion one (F1) module 207
 fuzzy “belief” promulgation 264
 Fuzzy Mediation model 208

G

Game of Life 69, 70, 261, 289, 295
 Game of Life, message driven 262
 Game of Life, rule variations 73
 Game of Life, traditional rules 72
 geographical information systems (GIS) 345
 grammatical formalism 186
 groups, and social networks 126

H

hardware/software details 269
 hemispheric asymmetry 281
 heterogeneous multi-agent systems 158
 hierarchical Q-learning 295
 horizontal coordination 149
 Host Intrusion Detection Systems (HIDS) 327
 Host Intrusion Prevention Systems (HIPS) 328
 human-agent interaction 35
 Human-Computer Interaction (HCI) 216
 human-like agents 66
 Human-Robot Interaction (HRI) 216
 human-robot interaction experiment 215
 human computer interaction 35
 Human Computer Interaction (HCI) 235
 hybrid architecture, introduction to the 204

I

‘Informant Design’ (ID) 235
 IIOP 93

indirect reciprocity 255
 individual sensorimotor exploration 147
 information overload 66
 inter-agent interaction 199
 interactive systems, major types of 37
 interoperability
 CORBA 94
 interpersonal behavior 40
 Intrusion Detection Systems (IDSs) 326
 iterated prisoner’s dilemma (IPD) 174

K

Kohonen 160

L

language games 187
 law, emergence of reasoning structures in 319
 LEA (Local Education Authority) 231
 learning, by social instruction 150
 learning approach, for training coordination
 proxies 159
 legal reasoning 317
 legal systems 305

M

malicious traffic 325
 Markov decision processes (MDP) 161
 meanings, construction of 146
 meanings, corpus-based 145
 meanings, from preverbal to linguistic 141
 meanings, in artificial systems 142
 meanings, socially shared 146
 memetics 53
 message driven communication 262
 messages, modifying while in transit 90
 methodological individualism 4
 microeconomics 1, 2
 mirror neuron system (MNS) 275
 mixed-initiative 159, 160, 163, 165
 mixed-initiative HAMQ learning 169
 modeling transmission, of cultural information
 51
 Monte-Carlo algorithm 163
 MRE (Mission Rehearsal Exercise) 126
 multi-agent models 1
 multi-agent societies 276

Index

multi-agent systems 1
multi agent system models 2
multiagent systems (MAS) 215
Multiagent Wumpus World (MWW) 56

N

near zero-context environment 215
Network Intrusion Detection Systems (NIDS) 325
NICE (Narrative Immersive Constructionist/
Collaborative Environments) 131
Non-Damasian frameworks 203
non-human agents 215
non-reflexive social emergence 27
Normative Echoes 298

O

observed causes (OCs) 55
observer, role of the 29
online auctions, buying and selling 66

P

‘participatory design’ (PD) 235
paradigms of cognition 25
partner selection, insufficiency of image in 255
passive inquiry 70
performance
 of implementation 100
philosophy of science, contribution from 19
Photo-elicitation 236
plain old Groovy objects (POGOs) 344
plain old Java objects (POJOs) 344
pre-shared key (PSK) 337
predict the effects (PEs) 55
prefrontal cortex (PFC) 278
prey/predator pursuit game 165
process dependencies 92
process of abstraction 288
process of emergence 288
propositional logic 185
proxy agent 160

Q

quality of service (QoS) 342
quasi-object 224
querying 345

R

random selection 74
Random Selection Model 75
random traversal 74
reciprocal altruism 243
reflexive social emergence 28
reinforcement learning 161
 hierarchical abstract machines 162, 171
 temporal-difference 161
reinforcement learning, of abstract actions 161
reinforcement learning, of user preferences 163
REPAST S 344
Repast Symphony (Repast S) 342
repetitive TMS (rTMS) 278
reputation, as informational reciprocal altruism 255
reputation, cognitive view of 246
reputation, evolutionary consequences 248
rolandic mu suppression 277
rule-based reasoning (RBR) 308

S

“self” system 278
school classes, as social networks 127
scripted rule evaluation 269
search engines 342
self-organizing feature maps (SOFM) 160
semi-Markov decision process 162
semi-Markov decision processes (SMDPs) 162
service-oriented computing (SOC) 342
simulation methods 17
SISTER 176
SISTER, how it works 178
SISTER agents 180
social behavior, in animals 39
social emergence, non-reflexive 27
social emergence, reflexive 28
social interaction 35
social interaction, between Agents, both human and artificial 36
social networks, and groups 126
social perception 41
Social Psychological Theory, agent-based modeling and 46
social psychological theory, in the development of agent-based interaction 39

social science, contribution from 20
stable emergents, level D 5
Sugarscape 296
symbolic interactionist simulation 175
Systems Theory, contribution from 20

T

temporal dependencies 91
theories of meaning 140
Theory Of Emergence, brief recount of the 18
Theory of Mind (ToM) 275, 279
threaded interaction 74
Threaded Model 78
transcranial direct current stimulation (tDCS)
278
transcranial magnetic stimulation (TMS) 276
transmission, process of 247
Travelling Salesman Problem 97
Turing test 37
turn-taking 215

U

UDDI (universal description discovery and
integration) 342

V

virtual genetics 199
Virtual Learning Environment (VLE) 126
Virtual Learning Environments (VLEs)
125, 229
vote tampering 336

W

warm simulation environments 69
WSDL (Web services description language)
