

# Index

## Symbols

3CC framework 21  
3G communications technology 15, 50, 91

## A

action research 231–232  
advanced radio telephony 15  
agent-based modeling (ABM) 324–325  
automated information network (AIN) 265  
autonomous system (AS) 104  
average revenue per user (ARPU) 539

## B

balli, balli 82  
Bangladesh Telegraph and Telephone Board (BTTB) 62–77  
bootstrap installed base 181  
broadband 759, 763, 768  
Australia 819–841  
Canada 819–841  
Chile 427–447  
China 842–854  
France 350–365  
Germany 227–240  
impact on movie industry 563–580  
India 842–854  
in organizational communication 637–654  
Ireland 211–226  
Kingdom of Saudi Arabia 380–394  
Latin America 711–728  
main features of 779  
national policies 671–688  
regulatory policies for 777–796  
rural use 395–407  
Singapore 449–465

social consequences of 619–636  
broadband adoption and diffusion (BAD) 1–12  
broadband diffusion 231–240, 242, 281, 729–755  
broadband divide 723  
broadband lite 825

## C

cable television law 56  
carriers of last resort (COLRs) 99  
carrying capacity hypothesis 253  
CLECs 281, 286  
competitive local exchange carriers (CLECs) 279  
competitive stimulus hypothesis 242, 253  
Confucian dynamism 82  
content validity 339  
content validity ratio 340–342  
customer access network (CAN) 128  
customer behavior model graph (CBMG) 410, 413

## D

diffusion models 731–732  
diffusion of innovation 231, 233  
diffusion rate 142  
diffusion theory 731  
digital communication networks 659  
digital data network (DDN) 62  
digital divide 34, 35, 42, 163–164, 165–169, 214, 229, 241–259, 264, 391, 433–439, 623–627  
distribution windows for movies 564–567

## **E**

- e-health
  - definitions 593, 605
  - in developing countries 581–592
- e-literacy 38, 39, 40
- e-procurement 34
- e-Vital 605–618
- early adopters 82
- Eastern Goldfields Regional Reference Site (EGRRS) 594–603
- econometric methods 745–748
- edutainment 82
- Electronic Medical Record (EMR) 587
- empirical analysis 757, 763
- endogenous growth theory 261

## **F**

- factors
  - demand-side 142–146
  - supply-side 142–146
- FDI 262, 273
- Fiber to the Home (FTTH) 90, 94, 128
- Fiber to the Node (FTTN) 128
- foreign direct investment (FDI) 261, 265

## **G**

- GoldHealth 599–603
- government-to-business (G2B) 75–77
- government-to-government (G2G) 75–77
- guideposting 683

## **H**

- H.323 799

## **I**

- industrial network approach (INA) 353
- information age 31
- information infrastructure 180
- Innovation-Decision Process
  - 307, 310, 313, 315
- Innovation-Diffusion Process 308
- innovation diffusion theory (IDT) 307
- Institute of Electrical and Electronics Engineers (IEEE) 350
- integrated services digital network (ISDN) 14

- international private leased circuit (IPLC) 66
- International Telecommunication Union (ITU)
  - 90, 109, 135
- Internet-friendly classrooms 80
- Internet protocol (IP) 132
- internet protocol television (IPTV) 539–562
- Internet service providers (ISPs) 71–77
- intertwining 638, 647–648
- IP telephony 94, 101
- IS continuance model 452–454

## **K**

- killer application 126, 127, 131–132, 331, 366

## **L**

- liberalization trend of telecommunication (TLC) 161
- local loop unbundling (LLU) 25, 140, 198, 216, 222, 622, 766, 822

## **M**

- Maslow's hierarchy 24
- metropolitan area network (MAN) 197–210
- model of adoption of technology in households (MATH) 307, 309
- multinomial logistic regression (MLR) 497
- multivariate adaptive regression splines (MARS) 757–776

## **N**

- Netflow 409
- Networked Readiness Index (NRI) 61

## **O**

- Organization for Economic Cooperation and Development (OECD) 109, 134, 139, 140, 149, 150, 427

## **P**

- PC Baangs 270
- peer-to-peer application 21
- peer-to-peer communication 135
- piracy

## ***Index***

digital 567–580  
physical 567–580  
plain old telephone service (POTS) 90, 91  
Porter's Five Forces 541  
profit maximization hypothesis 242  
public-private partnership (PPP) 39

## **R**

redlining 242, 253  
regulatory framework 140  
remote access servers (RAs) 62  
remote monitoring 584  
remote patient monitoring (RPM) 604–618  
residential gateway system (RGW) 655–670  
resource-based view (RBV) 353  
responsibility ascription 234–236  
Rogers' diffusion theory 382

## **S**

S-Curve 396  
sessions initiation protocol (SIP) 799  
small-office/home-office (SOHO) 18, 408–411, 414–426  
small and medium-sized enterprises (SMEs) 263  
adoption of ICT 524–537  
e-business strategies 493–503  
England 504–523  
Italy 467–480  
UK 481–492  
social construction of technology (SCOT) 484–485  
Star Model 541–544  
submarine cable 67, 71  
substantive theory 79  
synchronous digital hierarchy (SDH) 65  
system dynamics (SD) 323–336

## **T**

technological competition 764  
technology-organization-environment (TOE) framework 508–510, 525  
technology acceptance model (TAM) 307, 382, 449–450, 525  
telemedicine 272–273, 583–584, 586  
theory of planned behavior (TPB) 449–451  
theory of reasoned action (TRA) 449–451  
total element long-run incremental cost (TEL-RIC) 288, 703

## **U**

unbundled network elements (UNEs) 278, 279  
unbundling 287–289  
UNE rates 280, 287–289, 290  
unified theory of the adoption and usage of technology (UTAUT) 307  
universal service system 95  
Unix-to-Unix copy protocol (UUCP) 71–77  
uses and gratifications (U&G) approach 367–379

## **V**

vertical disaggregation 130  
voice over Internet protocol (VoIP) 75–77, 126, 132, 146, 219, 228, 658, 797–818  
definition 798

## **W**

WiMAX 806–810  
wireless Internet hotspot 349–365  
wireless LAN 48  
World Internet Project (WIP) 427
