

## Acknowledgment

The editors would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been adequately completed. Most of the authors of chapters included in this book also served as referees for chapters written by other authors. Thanks are due to all those who provided constructive and comprehensive reviews.

Special thanks also go to the publishing team at IGI Global, whose contributions throughout the whole process from inception of the initial idea to final publication have been very valuable. In particular, the editors would like to thank our development editor, Kristin Roth, who helped immensely in the opening phase of the project and our assistant development editor, Meg Stocking who continuously sent e-mail reminders in order to keep the project on schedule.

Nedeljko Cvejic's warmest appreciation is due to his loving wife, Ana, for being a wonderful source of love, understanding, and encouragement in his life.

The compilation of this book has been a stimulating experience. We believe that this book will be a useful addition to the literature on digital watermarking, because this is the first book that focuses on audio watermarking.

At the end, we wish to thank all of the authors for their insights and excellent contributions to the book.
