We take this opportunity once again to thank from the core of our heart all our contributing authors for their excellent chapters. Initially this book was thought to be published as an e-book. Then it was decided to get it published through a reputed publisher. Thus this project took more time to completion. Our thanks goes to all the authors for their understanding. We have been demanding much information from them every now and then, they have been very gracious in accommodating us on every step. Due to their efforts and willingness, we were able to bring this book within the schedule.

Ugur Demiray
