

Acknowledgment

I have received generous encouragement and assistance from my former teachers in the Dental School, University of Athens.

I gratefully acknowledge the efforts of the anonymous reviewers, who made a great number of pertinent and constructive comments that helped me to improve the book significantly.

I sincerely acknowledge the help of all persons involved in the collation and review process of this book, without whose support the project would not have been satisfactorily completed.

I wish to express my appreciation to my colleagues, Prof. Petros Koidis, from The University of Thessaloniki, Dr. Athina Lazakidou from the University of Peloponnese, and Dr. Cathrin Dressler from Laser- und Medizin-Technologie GmbH, Berlin, who, as experts in their fields, have helped me with constructive criticism and helpful suggestions.

Special thanks also go to the publishing team at IGI Global, and especially Kristin M. Klinger whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular to Julia Mosemann, Joel Gamon, who continuously prodded via e-mail for keeping the project on schedule and to Jan Travers, whose enthusiasm motivated me to initially accept his invitation for taking on this project.

Last but not least, I am grateful to my father, Dimitrios Daskalakis, for his unfailing support and encouragement.

In closing, I wish to thank all of the authors for their insights and excellent contributions to this handbook.
