

Index

Symbols

3G (third generation) mobile networks 23

A

agent migration 47
agent migration process 49
artificial neural networks (ANNs) 218
ASIMIL 127

B

British Telecommunications 42
business-to-business (B2B) applications 40
business-to-business (B2B) relationship 20
business-to-consumer (B2C) applications 40
business-to-consumer (B2C) relationship 20

C

clustering algorithm 99
collaborative filtering (CF) 97
constraint satisfaction problem (CSP) 56–76
consumer agent (CA) 32
consumers 19
consumers' demands 19
content based filtering (CBF) 97
continuous K nearest neighbor (CKNN)
154–174
continuous learning 213
continuous learning Naïve bayes (CLNB) algo-
rithm 210–255

D

DAR algorithm 161
Dijkstra's algorithm 158
discovery 22

distributed discovery systems 272
distributed e-business environment 43
document indexing 137
document modelling 138
domain oriented K nearest neighbor (DOKNN)
225
dot-com bubble 135

E

e-business 39
e-commerce 285
e-market 33
e-portfolio 117–133
e-Qualification 117
e-Qualification process 126
eDar algorithm 165
email filter 135
ePAT 178

F

FIPA 39
FIPA ACL standard 82

G

Galois connection 199
graph network analysis 1–18
Grid computing 118

H

HITS Rank 10
HTTP 26
hubs-authorities rank 9

I

incremental network expansion (INE) 157
 informal learning 119
 information-driven Web sites, measures for 286
 intelligent agents 41, 57
 intelligent software agents 27
 interactive email filtering 134–153
 interactive email filtering, problems with 136
 interactive email filtering, purpose of 139
 Internet-based shopping 40

K

k-nearest neighbor (KNN) 218
 k-nearest neighbor (KNN) query 156
 Knowledge Query Manipulation Language (KQML) 63

L

learning 213
 Learning Grid 117
 local-relative ranking metrics 9

M

MAFIA 100
 matching agent (MA) 32
 memory usage 101
 mobile, intelligent agent-based e-business architecture 39–55
 mobile agent 41
 mobile agent, behavior 46
 mobile devices 40
 multiagent architecture overview 79

N

Naïve bayes classifier 222
 nearest neighbor (NN) search 155
 network agent (NA) 31
 network Voronoi diagram 159
 next-generation network 19
 next-generation network, and service provisioning 21
 next-generation network environment 22–23

O

Open Grid Services Architecture (OGSA) 118
 OWL-S 26, 77

P

peer to peer (P2P) agents 125
 peer to peer (P2P) review 129
 personal digital assistant (PDA) 40
 PIA-agent 57
 PIA-agent architecture 64
 prediction-learning-distillation (PLD) 134, 137
 probabilistic IA agent (PIA-Agent) 56
 probabilistic IA network (PIA network) 60
 Probabilistic Interval Algebra network (PIA network) 57
 progressive incremental network expansion (PINE) 154–174
 Proof Markup Language 78
 proof of concept, example 89
 provider agent (PA) 31

Q

QoS discovery systems 272
 quality of service (QoS) 23

S

SCuBA 96–116
 search engine 196
 search engine analysis 297
 Semantic Grid 118
 Semantic Web 25
 Semantic Web services 23, 77
 service-orientation 256
 service-oriented architecture (SOA) 257–266
 spam 135
 spatial network 159
 spatial network database (SNDB) 154
 subspace clustering algorithm 100
 subspace search 101
 summarization, with extraction rules 202
 support vector machines (SVM) 220

T

text classification (TC) 211
text summarization 195–209, 203
traditional learning 213
traditional Web page classifier 212
transaction based success measures 285

U

United Nations 203
Universal Description, Discovery and Integration (UDDI) 267
user terminal 23

V

vertical Web page classifier 212
virtual communities 118
virtualization, and service-orientation 258–266
virtual lab 125
virtual learning community (VLC) 120
virtual learning Grid community 120
virtual learning group communities 117–133
virtual organizations 78
Voronoi diagram 158, 159

W

Web page classification 210–255
Web page classifier 212
Web service 24

Web service architecture 25
Web service composition 1–18, 3
Web service composition solution 7
Web Service Description Language (WSDL)
268
Web service discovery systems, a survey of
267–283
Web service paradigm 1
Web service rank 5
Web Services Resource Framework (WS-RF)
256
Web site performance analysis 284–298
Web sites objectives 284
Web site visits 287
World Wide Web (WWW) 211
World Wide Web (WWW), growth of 97
WSDL bindings 269
WSDL messages 269
WSDL ports 269
WSDL types 269

X

XML query processing 175–194

Z

Zeus agent toolkit 42
