

Acknowledgment

The editor would like to acknowledge the help of all involved in the review process of the book, without whose support the project could not have been satisfactorily completed. Deep appreciation and gratitude is due to Prof. Subhash Kak, Prof. Francisco Ares-Pena, Prof. Paolo Arena, Prof. Charles-Antoine Brunet, Prof. Mika Ala-Korpela, Prof. Jerome R. Busemeyer, Prof. Andrew J. Hanson, Prof. Ton Coolen, Prof. Sudeshna Sinha, and Prof. Ramakrishna Ramaswamy for recommending potential reviewers, and to Prof. Akira Hirose for providing the list of presenters of the special session on complex-valued neural networks at the 2006 International Joint Conference on Neural Networks (IJCNN2006). He would also like to thank Dr. Harumasa Okamoto, former director of Neuroscience Research Institute (NRI), National Institute of Advanced Industrial Science and Technology (AIST), Dr. Takahisa Taguchi, director of NRI, AIST, and Dr. Shotaro Akaho, leader of Mathematical Neuroinformatics Group, NRI, AIST for providing a supportive working environment, allowing him the opportunity to concentrate on the editing.

Most of the authors of chapters included in this book also served as referees for chapters written by other authors. Thanks go to all those who provided constructive and comprehensive reviews.

Special thanks also go to the publishing team at IGI Global, whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular to Mr. Deborah Yahnke and Ms. Heather A. Probst, who continuously prodded via e-mail for keeping the project on schedule and to Ms. Lindsay Johnston, Ms. Kristin M. Klinger, and Ms. Corrina Chandler, whose enthusiasm motivated me to initially accept their invitation for taking on this project.

Special thanks go to the members of the Editorial Advisory Board for this book project for their helpful supports. And last but not least, my wife, Eiko, for her unfailing support and encouragement during the months it took to give birth to this book.

In closing, I wish to thank all of the authors for their insights and excellent contributions to this book.
