

Index

A

agent system, role concepts in 256
 agent system design 254
 agglomerative clustering 19
 application ontology 5
 artificial intelligence 254
 autonomy 255

C

clustering 19, 83, 98
 clustering, agglomerative 19
 clustering, divisive 19
 clustering, hierarchical 19
 clustering, link-based 105
 clustering, text-based 105
 clustering, Web documents 99
 clustering, Web users 99
 clustering algorithms 105
 cluster labeling 13
 cognitive filtering 31
 collaborative filtering 30–54
 conceptualization 3–5
 conceptualization, shared 3–5
 content-based image retrieval (CBIR) 194–219

D

default voting 35
 divisive clustering 19
 domain ontology 5

E

E-CARGO model 262
 Euclidian distance formula 38
 existential graph 287

F

filtering 64
 filtering, cognitive 31
 filtering, collaborative 79
 filtering, sociological 31
 formal concept analysis (FCA) 18
 fuzzy theory, introduction to 170

H

hierarchical clustering 19
 human machine interaction 293

I

image keywords 198
 image segmentation 199
 information discovery 62
 information dynamics 60, 70
 information filtering 63
 information fusion 65
 information heterogeneity 58–76, 69
 information overload 59, 69
 information personalization 67
 information problem 55–76
 information quality 173
 information retrieval 62, 220
 in integrated region matching (IRM) 205
 integrated region matching (IRM) 200

J

jini technology 143
 JUNG 183

K

knowledge representation 293

knowledge representation and reasoning (KRR) 288

L

learning, machine 2
 learning, multiple instance 203
 learning, ontology 1, 8
 learning, probabilistic feature relevance 205
 learning, relevance feedback 194–219

M

machine learning 2
 MESSAGING SERVICE 224–231
 multi-agent system (MAS) 286
 multiple instance learning (MIL) 203

O

OntoDiscFM 13
 OntoLearn 20
 ontologies, classification of 4
 ontologies, definitions and overviews 2–4
 ontology, application 5
 ontology, domain 5
 ontology, task 5
 ontology, top-level 5
 ontology engineering 5–6
 ontology learning 1, 8
 ontology learning, from text 8
 orientation, problem 121
 orientation, service 123

P

pattern analysis 84
 personalization 15, 67, 79–97
 personalization, check-box 79
 personalization, observational 79
 personalization process 80
 personalization research 91
 personalized information retrieval 290
 personalized information seeking 119–150
 personalizing, Web services 232–253
 Platform for Privacy Preferences (P3P) 153
 privacy 151–166
 probabilistic feature relevance learning (PFRL) 205

problem orientation 121

Q

quality 173
 quality filters 167–193

R

relevance feedback (RF) learning 194
 reminding service 223–231

S

semantic feature extraction 13
 service-oriented architecture (SOA) 221–231
 service orientation 123
 shared conceptualization 3–5
 similarity measure 199
 sociological filtering 31

T

task ontology 5
 top-level ontology 5
 Tourist MobileBook 234

U

user agent 157
 user profile data 15

W

Web data 15
 Web personalization 1, 77–97
 Web service personalization 232–253
 word sense disambiguation (WSD) 10, 23
