

Acknowledgment

This book would not be possible if I did not enjoy the entire support of the publisher, IGI Global. A chain of helpful consultants, whose last link was Ms. Jessica Thompson, walked with me the bumpy way of forming the unstructured incoming material of interrelated articles to a reasonable thematic concatenation. For the history of the book, the first link was Dr. Mehdi Khosrow-Pour, whose enthusiasm motivated me to initially accept his invitation for taking on this project.

In academic terms, the incentive and the know-how has been tapped from the EU funded SOCRATES-MINERVA project “SEEArchWeb-South Eastern Europe Archaeology Web,” that has provided the knowledge pool on the e-learning dimension of computer applications in archaeology.

The first coordinator of this project, professor I.A. Tsoukalas, then head of the Department of Informatics, Aristotle University of Thessaloniki, and currently secretary general for research and technology in the Hellenic Ministry of Development, has kindly accepted to foreword this volume. I feel grateful for his willingness to support novelty.

Special thanks go to two world renowned archaeologists, professor emeritus of *Université Paris I, Panthéon - Sorbonne* Marion Lichardus-Itten and professor Rudolf Echt of the *Universität des Saarlandes*, that have contributed in chapters 6 and 14 by projecting in the e-learning dimension their long expertise in supervising the excavation works of the Kovačevo and Drama-Merdžumekja sites, respectively, in Bulgaria.

Some of the authors of chapters included in this book also served as referees for articles written by other authors. I would like to express my gratitude to the pool of reviewers, who have helped in evaluating and homogenizing research outcomes originating from different authors and expressed in variant styles. They are:

- Thrasyvoulos Tsiatsos
- Cèsar Carreras
- Konstantinos Kechagias
- Panagiotis Linardis

Last, but not least, I would like to thank all the contributors of this book, who have lined up in transferring further knowledge on how e-learning methodologies could benefit and reshape the subject domain of archaeology.

In closing, I wish to express my deep appreciation to my wife and children, to whom this book is devoted to, for providing me the needed inspirational resources to balance my career and family trajectories.
