

# Index

## A

active-processing assumption 300  
activity theory 344  
adaptability 373  
adaptive content 374  
AHA project 377  
analytical hill shading 152  
ArcGIS 131–146  
ArchES 201–210  
ArcIMS 132, 134–137  
ArcXML 137  
ARION 149, 175, 177–183, 185–199  
associative processing 295  
asynchronous communication 60  
avatar 392, 413

## B

balkanization 256  
biosensors 417  
blog 261–263

## C

C4.5 319  
cognitive architecture 295  
cognitive load theory 291, 295  
cognitive theory of multimedia learning 300  
cognitive walkthrough method 169–170  
coherence principle 304  
collaborative filtering 373  
collaborative geographic information systems (CGIS) 326  
collaborative learning 411  
collaborative spatial decision making (CSDM)

## 333

collaborative virtual environments (CVEs) 20, 27, 31  
computer aided design (CAD) 131  
concept of interactivity 410  
constructionism 413  
constructivism 413  
constructivist 279  
content-based filtering 373  
content management systems 263–269  
contextual approach 344–345  
contiguity principle 306  
cookies 373  
cooperation distinction 328  
copyright protection 223–225  
cross-cultural e-learning 277  
cross-cultural language learning 419  
CSound 180

## D

dandelion head 317  
data mining 319, 321  
delphi method 334  
digital elevation model (DEM) 152  
distance education 3  
Drama-Merdžumekja 230–254  
dual-channel assumption 300  
dual-coding theory 291, 293  
dual-store model 291  
Dynamic Virtual Museum 158–174

## E

e-journal 255

e-learning 2.0 8  
e-publishing 223–229  
eclectic integration 327  
electronic forums, posting in 255–276  
electronic guidebook research project 382  
electronic publishing, legal issues 222–229  
elementary modeling structure 353  
ELENA project 377  
epistemology 329  
evaluation mechanisms 417  
EVE Training Area 19, 24–27, 29  
excavation terms 108  
excavation units (U.F.) 88–89  
expert systems (ES) 200–211  
exploratorium 382  
extraneous cognitive load 296

## F

foreign key (FK) 112  
formal e-learning 377  
functional ACT-R model 291

## G

genetic algorithm (GA) 319  
genetic algorithm techniques 312  
geographical information systems (GIS)  
80–81, 129–146, 151  
germane cognitive load 297  
GIScience 335

## H

Haiku 312, 314, 319, 322  
hypermedia 58  
hypertext 60, 74

## I

immersive learning environments 410  
influence relationship 348  
informal e-learning 377  
Ingenious project 380  
Instructional Design 41–45  
interactive digital media 420  
interdependence 293  
internet map server (IMS) 133–134

In Touch project 380  
Intrinsic cognitive load 295

## J

Java Expert System Shell (Jess) 205

## K

Kithara 175  
knowledge discovery 312, 314, 319  
knowledge domain 329  
Kovačević 84–104

## L

learner-centered approach 299  
learning platform 143–145  
limited-capacity assumption 300

## M

machine translation (MT) 212–221  
memory load 295  
metacognitive strategy 298  
methodical skeleton for method engineering  
(MEMES) 361  
methodological resources assistant (MRA) 44  
microthemes 30  
mixed genre environments 420  
mobile computer supported collaborative learning  
(mCSCL) 9  
modality principle 303  
morphology 213–214  
multidimensional construct 295  
Multimedia Educational Resource for Learning  
and Online Teaching (MERLOT) 8  
multimedia pedagogy 295  
multimedia principle 302  
multimodel action structure 353  
MySQL 158–159

## N

National Center of Geographic Information and  
Analysis 333  
Newtonian space 316  
nonconventional learning 412  
nonverbal system 294

**O**

ontology 328  
OPEN process framework (OPF) 358  
Open University of Catalonia (UOC) 36–48, 65–79  
ORPHEUS 149, 175, 183–185

**P**

p-journal 255  
parthenogenesis 4  
passive evaluation mechanisms 417  
pragmatic theory 344  
prescriptive learning 419  
preventive excavation 82  
procedural learning 416

**R**

radiosity 154  
rasterization 154  
ray casting 154  
ray tracing 154  
reconstruction 147  
redundancy principle 304  
referential processing 294  
refinement relationship 348  
remote learning 413  
representational processing 294  
rescue excavation 82  
research excavation 82  
Rome Reborn project 13  
rule-based filtering 374

**S**

SAGRES system 377  
sea navigation 49–50  
SEEArcWeb 129, 138, 201, 212, 216–219, 255, 269–274  
segmentation principle 307  
semantic theory 344  
Seven S's scheme 345  
Shrine Educational Experience (SEE) 389–407  
signaling principle 305  
single-model action structure 353  
smart environments 10  
social modeler 200–211

solid modeling 150  
spatial analysis 80  
spatial decision process 327  
spatially contiguous 307  
spatial map 334  
stratigraphy 83–84  
surface modeling 150

**T**

taphonomy 85–86  
triangulated irregular networks (TINs) 152

**U**

ubiquitous computing 10

**V**

verbal system 294  
VirRAD European project 22  
virtual classroom 389  
Virtual Conference 19, 22–23, 26–27  
virtual environments 408  
virtual exhibition 257–258  
virtual learning communities 50–56  
virtual learning environment (VLE) 37, 39, 40  
virtual museums 149  
virtual reality (VR) 147  
virtual reality modeling language (VRML) 159–160  
virtual reconstructions 147–157  
virtual settings 281  
virtual worlds 12–13  
Visite Plus service 381  
visual interaction tool for archaeology (VITA) 155  
visualisation 314, 317

**W**

Web-based instruction (WBI) 57–58  
Web-based learning 389  
Web 2.0 10–11  
Web usage mining 374  
working memory model 291  
World Open Material project 8
