

Acknowledgments

The editor would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed.

Most of the authors of chapters served as referees for chapters written by other authors. Thanks go to all those who provided constructive and comprehensive reviews. Support of the Division of Engineering and Information Science at Penn State Great Valley is acknowledged for providing administrative services for the project from beginning to end.

Special thanks also go to all the staff at Idea Group Inc., whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular, I am very grateful for Kristin Roth, who continuously prodded via e-mail for keeping the project on schedule, and for Mehdi Khosrow-Pour, whose enthusiasm motivated me to initially accept his invitation for taking on this project.

In closing, I wish to thank all of the authors for their insights and excellent contributions to this book. I also want to thank all of the people who assisted me in the reviewing process. Finally, I want to thank my wife, Lihua Zhang, and children, Lawrence and Jason, for their love and support throughout this project.
