

Acknowledgments

The editor would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed. Also, a special word of thanks to Prof. Rembrandt Klopper who helped to ensure that the papers are on the same level and that they flow into each other. Deep appreciation and gratitude is due to Prof. Klopper for other editorial support services for coordination of this yearlong project.

Some of the authors of chapters included in this book also served as referees for articles written by other authors. Thanks go to all those who provided constructive and comprehensive reviews. Support of the School of Information Systems and Technology at the University of KwaZulu-Natal is acknowledged for archival server space in the completely virtual online review process.

Special thanks also go to all the staff at Idea Group Inc., whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular to Kristin Roth, who continuously prodded via e-mail for keeping the project on schedule.

In closing, I wish to thank all of the authors for their insights and excellent contributions to this book. I also want to thank all of the people who assisted me in the reviewing process. Finally, I want to thank my wife and son for their love and support throughout this project.

Sam Lubbe, PhD
