

Index

A

Abstract Data Types (ADTs) 397
 abstract generalization 398
 abstraction processes 92
 active domain 319
 add dimension 125
 add level 113
 add multiplicity 112
 aggregate formation 117
 aggregate operations 53
 aggregate range query 203
 aggregation 93, 255
 aggregation function 5
 aggregation hierarchy 93
 aggregation relation 10
 aggregation-by-template 119, 260
 association 93
 attribute hierarchy 229

B

base cuboid 216
 base data 283
 base predicate 8
 base relation 16
 binding attributes 395, 414
 bucket algorithm 376

C

Cartesian product 125
 category attribute 8, 30
 category attributes 261
 classification 92, 255
 classification hierarchies 30

classification structures 60
 complementary suppression 313
 complete containment function 404
 conceptual 71
 conceptual coordinate 78
 conceptual data model 73
 conflict resolution 370
 consolidate operation 55
 constraint system 320
 correct aggregation 95
 covering 286
 cross-component edges 325
 cross-tabulation 124
 cube-lattice 231

D

data analysis 2
 data cleaning 380
 data cube 70, 124, 253
 data cubes 202
 data integration 363
 data model 117
 data source 14
 data structure 117
 data warehouse 361
 data warehousing 70
 data-cube 231
 database scheme 71
 Decision Support Systems (DSS) 201
 default value 295
 delete level 112
 derived data 283
 dice 405
 dice operation 55

dimension hierarchies 255
 dimension table 229
 dimensions 261
 directed edges 325
 directed path 325
 disjunctive value 288
 dominance rule 315
 drill-down 127, 283
 Dynamic Data Cube (DDC) 205

E

eager strategy 286
 efficiency issue 55
 elementary query 320
 entity-relationship model 70
 existential null 288
 explicit category attributes 25
 Extended Relational Algebra (ERA) 119

F

fact table 229, 255
 field-based 396
 first-class concepts 63
 flow 100
 functional dependencies 10

G

generalization 92
 generalized projection 260
 Geographic Databases (GDBs) 393
 Geographic Information Systems (GISs) 394
 geometric features 396
 global schema 362
 global-as-view 363
 Global-as-View (GAV) 374
 grouping 264
 grouping (relation) schemes 264
 grouping algebra 124
 grouping relations 264

H

heterogeneity conflicts 368
 Hierarchical Band Cubes (HBCs) 208
 Hierarchical Cubes (HCs) 208

Hierarchical Rectangle Cubes (HRCs) 208
 hierarchy 8, 92
 hierarchy of abstraction 92
 homogeneous 102
 homogeneous dimensions 102

I

implied aggregation 53
 imputed value 295
 incomplete measures 292
 indefinite value 288
 indexing techniques 259
 inference model 318
 insert level 111
 integration mediators 379
 intentional and extensional space 31
 Iterative Data Cubes (IDCs) 209

K

kernel(H) 330
 knowledge-based approaches 384

L

lazy 286
 least upper bound 235
 link 324
 local-as-view 363
 local-as-view (LAV) 374

M

macrodata 4
 map cube operator 409
 materialized view 224
 maximally contained rewritings 375
 maybe value 288
 MDmat-problem 240
 measures 284
 Mefisto model 122
 metadata 4
 missing null 288
 monotonic 240
 Multidimensional Aggregate Data (MAD) 5, 21, 24, 99, 118
 Multidimensional Aggregate Data Structure (MADS) 15, 21, 24

multidimensional cube algebra 124
 multidimensional data 47, 255, 403
 multidimensional data manipulating 2
 multidimensional database (MDDb) 227,
 284, 393, 394
 multidimensional lattice 232
 Multidimensional OLAP (MOLAP) 202
 multidimensional scheme 77
 Multidimensional Statistical Databases
 (SDBs) 3
 multidimensionality 26
 multiple hierarchy 102
 multiple imputation 294

N

n-dimensional table schema 266
 naming conflicts 368
 natural join 125
 nested multidimensional data cube 126
 no information value 289
 nowflake scheme 83
 null value 283
 numerical dependencies 254

O

object-based approaches 396
 OLAP Operators 107
 On-Line Analytical Processing (OLAP)
 21, 48, 201, 394
 operator descendent 233

P

partially known values 288
 partition 398
 pCube 214
 polidimensionality 26
 pre-aggregated cube 203
 prefix range query 205
 preintegration 367
 primary suppression 312
 primitive category attribute 17
 primitive dimension 9
 primitive hierarchies 9
 priority queue 384
 probabilistic value 289

Q

quasi-cubes 290
 query answering 270
 query expansion 380
 query manager 379
 query processing problem 373
 Query Processor (QP) 379
 query rewriting 374
 query rewriting problem 254

R

randomly sampled value 295
 range queries 203
 range sum 203
 raw data (microdata) 254
 relational algebra 118
 relational calculus 118
 Relational OLAP (ROLAP) 202
 Relative Prefix Sum (RPS) 204
 representation levels 31
 representation spaces 31
 retrieved database 378
 rewritten query 270
 roll-up 127, 283, 405
 roll-up operation 55
 roll-up operator 107

S

S-cube 265
 salary 317
 schema comparison 368
 schema conforming 370
 schema integration 366
 schema integration 363
 schema mapping 372
 scientific multidimensional databases 56
 self-loop 324
 self-maintainable 215
 set nulls 288
 shared-variable bucket algorithm 376
 size estimating function 248

- slice 405
- slice operation 55
- slice operator 110
- snowflake schemes 256
- sorted neighborhood method 383
- source database 365
- source integration system 364
- space inclusion 399
- sparse data sets 214
- spatial data cube 409
- specialization hierarchies 8
