chained transactions 279
check-out mode 291, 292
classification hierarchies 16
classification problems (CP) 193
COMET 225
commercial-off-the-shelf (COTS) 216
common data model 3
common object request broker adapter (CORBA) 143
common query language 4
compensatable 277
compensating mode 286
compensating transactions 276
component concept 216
component-based development (CBD) 214
component-based software engineering (CBSE) 224
composite activity 168
Computer Science Corporations (CSC) 219
conceptual framework 56
contingency transactions 277
current price 48

D

data definition language (DDL) 81
data dissemination 281
data manipulation language (DML) 81
data mining (DM) 192
data mining algorithms 194
data node 307
data replication 282
data structure 201
data warehouse (DW) 13
data warehousing 75
database management systems (DBMSs) 74
database of a node 307
decision support 192
degenerate dimensions 21
derivation rules 20
derived attributes 15
descriptor attributes 15
dimension attributes 15
dimensional-fact (DF) 19
directed acyclic graph (DAG) 20
distributed database 129
Document Type Definition (DTD) 6
Dow Jones Industrial Average (DJIA) 260

E

E Persistent Virtual Machine (EPVM) 106
e-commerce 248
electronic commerce 303
elementary activity 168
entity-relationship diagrams (ERD) 219
entity-relationship model 37
event analysis 39
Exodus storage system 106
experimental studies 56
extensibility 107

F

fact attributes 15
fact constellations schema 18
failure atomicity 288
fixed network 271
flat diagrams 18
flat transactions 273
flexible transactions 286

G

genetic algorithm (GA) 197
global certification order (GCO) 289
global serializability (GSR) 288

H

home location register (HLR) 305
hotspots 281
human-computer interaction (HCI) 56

I

identifying attributes 15
in-memory object management 113
information and communication technology (ICT) 214
information heterogeneity 2
information interoperability 2
information mediation 1
information mediation meta-model 9
information objects 168
initial user requirements 14
Internet database 129
interoperability 2
invalidation-based consistency 284
isolation-only transactions model (IOT) 288

J

joey transaction 286
join point 167
join queries 131

K

kangaroo transaction 286
keyword languages (KL) 63
KobrA 222

L

laissez-faire 273
level of abstraction 57
load cost 143
local serializability (LSR) 288
location dependent data 330
log sequence number (LSN) 118

M

machine learning (ML) 193
mediation-based interoperability 2
Mediation of Information using XML (MIX) 6
meta-analysis 61
meta-meta-data 2
meta-model 8
meta-model based mediation 9
Microsoft Solution Framework (MSF) 219
mobile commerce services 248
mobile computers 270
mobile computing environment 270
mobile devices 269
mobile environment 269
mobile technology 269
mobile transaction proposals 270
mobile user (MU) 306
mobility 272
moflex transactional model 286
motion independence 270
MU-presenting node 307
multi-databases 130
multidimensional databases (MDB) 13
multiple classification hierarchies 16
multitransactions 276
multiversion broadcast 284

N

natural language (NL) 56, 63
nested transactions 276
non-additive 16
Norwegian Stock Exchange Market 262

O

object cache 107
object constraint language (OCL) 15

object manager 105
object modeling technique (OMT) 60, 218
object prefetch 121
object query language (OQL) 15
object-orientation (OO) 45
object-oriented (OO) 14
object-oriented models 56
object identifier (OID) 110
object manipulation language (OML) 117
OLAP operations 15
on-line analytical processing (OLAP) 13
on-line transaction processing (OLTP) 186
one-shot (OS) 308
online analytical processing (OLAP) 192
OO paradigm 216
OO1 benchmark 119
optimization 131
ordered domain 84
ordered relational model (ORM) 74
OS-multiple node version (OSM) 310

P

page cache 107
page-level locking 117
peer-to-peer (P2P) 97
personal data assistants (PDAs) 271
position independent code (PIC) 114
prediction-based hybrid strategy (PHS) 320
primary copy 285
processing node 307
product quantity cube 50
product sales 15
pseudo-transaction 291
pull-based 282
pure conceptual MD models 19
push-based 282

Q

quadratic discriminant model (QDM) 201
quantity on hand 48
quantity-databases 50
quantity-semantics 50
query accuracy 64
query formulation time 66
query node 307
query processing 304
query processing and optimization 130

R

rational unified process (RUP) 217
redo-only recovery 118
relational languages 56
relational models 56
replication models 284
root activity 173
root mean square error (RMSE) 197
run-time join optimizer (RTO) 157
run-time optimization 132

S

saga 274
sales order processing 48
scalability 141
select perspective 218
selective eager object fetch (SEOF) 122
semi-additive 16
serializability (SR) 288
snowflake schema 18
software agents 248
soprano 106
spaghetti 171
