

# Index

## A

access patterns 294  
activity definition 91  
agile development 1  
agile methodologies 2  
agile methods 1  
agility 274  
association 25  
attributes 25  
autonomy 273

## B

Barker ER 23  
BCNF 128  
binary relationships 194  
Boyce-Codd normal form 128  
business process outsourcing 273  
business rules 225

## C

call graph 156  
code generation 258  
cohesion metrics 93

cohesion notion 91  
communication 327  
component 1  
component-based 3  
components-based development 45  
component firewall 148  
conceptual data modeling 188  
conceptual model 167, 189  
conceptual schema 23  
constraints 27,107,258  
control flow 143

## D

database applications 142  
data flow 145  
data modeling 188  
data modeling process 196  
data warehouse 294  
derivation rules 28,225  
discovery 189  
DKNF 128  
domain-specific modeling 257  
domain familiarity 195  
domain key normal form 128

domain knowledge 195  
dynamic semantics 71

## E

entity-relationship modeling 189  
entity relationship (ER) 23  
entity types 25  
evaluation 45  
experts 195  
extensible markup language 275

## F

fact type 27,224  
federated database system 278  
fitness 168  
FSQL (FuzzySQL) 125  
fuzzy aggregation 106, 113  
fuzzy attributes 119  
fuzzy attribute defined specializations 119  
fuzzy cardinality constraint on overlapping specializations 116  
fuzzy completeness constraint on specializations 114  
fuzzy constraints in shared subclasses 122  
fuzzy degrees 113  
fuzzy EER model 106  
fuzzy quantifiers 109  
fuzzy set 108  
fuzzy set cardinality 118  
fuzzy set energy 118  
fuzzy specializations 106

## G

generic modeling environment (GME) 258

## H

human factors 189

## I

impact analysis 147  
information engineering 23

information system modeling 233  
inter-organizational process model 275  
interpreters 258

## K

"key frames" approach 327

## L

logical unit of work 91  
lexical object 26

## M

machine-readable motion alphabet 327  
metadata 294  
metamodel 23, 71, 257  
metaschema 24  
method 46  
missing information 128  
model 24  
model-driven development 2  
model composition 258  
motion byte 327  
motion data 327  
multiplicity 39

## N

non-lexical object 26  
normalization 128  
novices 195  
nulls 128

## O

object-oriented database 275  
object-oriented models 194  
object-oriented software 257  
object role modeling (ORM) 23  
OCL 258  
one-to-one relationship 128  
online analytical mining 294  
ontology 197

**P**

predicate 26  
problems 166  
process analysis 196  
process information sharing 273  
process model 275  
product-based workflow design 93

workflow management system 91  
workflow process 91

**R**

rater agreement 101  
regression testing 141  
relationships 25

**S**

service-oriented architecture 45  
software development methods 166  
state machines 71  
storage 327  
subtype definitions 33  
subtyping 26  
systems analysis 189

**T**

transparent process monitoring 273

**U**

UML 258  
unary relationships 194  
unified modeling language (UML) 23  
universe of discourse 23,224  
usability 189  
user surfing behavior 294

**V**

validation 189  
view maintainability 294  
virtual enterprise 289

**W**

web-based survey 100  
web services 45  
workflow management 92
