active configurations 263  
adaptive course delivery 234  
adaptive distributed learning environments 184  
adaptive e-learning 226  
adaptive e-learning system 218  
adaptive learning environment 191  
adaptivity 191  
administrative content 189  
agent communication language 21  
agent communicator manager 153  
agent deployment 23  
agent interactions 197  
agent learning 36  
agent management Web service 204  
agent migration 249  
agent practices statement (APS) 100  
agent systems 242  
agent technology 34, 184, 273  
agent-agent interactions 199  
agent-based human-machine interaction 147  
agent-based tutoring systems 146

agent-oriented software engineering (AOSE) 193  
agent-supported distributed learning (ADL) 70  
agent-supported distributed learning (ADL) x, 67  
agent-supported Web services 212  
agents 4, 184, 193, 195  
agents' autonomy 227  
agents' intelligence 227  
agents' mobility 227  
agents' sociability 227  
application program interface (API) 277  
artificial intelligence 119, 169  
artificial intelligence (AI) viii, 116  
assessment process 7  
asynchronous learning 165  
automated case-based reasoning (ACBR) 120  
avatars 273

## B

behavior understanding 285  
blackboard systems 16

## C

campus navigation supervision 287  
case-based coordination 121  
case-based learning 121  
case-based reasoning 119  
catalog agent 70

CBR reasoner 119  
 certification agent, 70  
 chat window 279  
 chemical reaction metaphor 242, 243  
 chemical reaction model 245  
 classroom 283  
 coach agent 75, 152  
 cognitive processing 147  
 collaboration agent 117, 135  
 collaborative agents 250  
 collaborative learning 33  
 collaborative learning environments 149  
 collaborative online learning environment (COLE) ix, 1, 6  
 collision avoidance expert system (CAES) 130  
 comment window 279  
 communication list 279  
 communication management 21  
 competency agent 70  
 computer-mediated communication systems (CMCSs) 101  
 computer-supported collaborative learning (CSCL) vii, 42  
 computer-supported collaborative work (CSCW) 34  
 configuration 198, 246  
 content-related competencies 2  
 contract-net protocol 17  
 controlling nodes 266  
 conversational case-based reasoning (CCBR) 120  
 cooperation language (Cool) 17  
 cooperative learning systems 149  
 corporate training 69  
 course agent 200  
 course content navigation supervision 287  
 course database 231  
 course maintenance agent 203  
 course personalization 230  
 course provider agent 232  
 course-content adaptation 221  
 course-navigation adaptation 221  
 course-planning agent 201  
 credential sharing 93

curriculum manager 153

## D

data collection 78, 80  
 data storage 78, 79  
 data transfer 266  
 data transmission 79  
 databases 206  
 decision-making support 131  
 declarative specification language 287  
 demand pulling 255  
 "Democratic" multiagent systems 17  
 design guidelines 77  
 deterministic finite state automata (DFA) 285  
 device profile repository 230  
 digital certificate-based mechanisms 88  
 digital learning 185  
 directory agent 152  
 discussion room 282  
 distance education 185, 274  
 distance learning 68, 69, 70, 186  
 distance learning systems 149  
 distance-learning technology 68  
 distributed collaborative learning 33  
 distributed collaborative-learning environments 33  
 distributed learning 162, 164, 186  
 distributed learning environments (DLEs) x, 116, 119, 184, 185, 186  
 distributed-learning standards 81  
 distribution 192  
 domain expert 220  
 domain knowledge 156  
 domain module 168  
 dynamic scalability 228

## E

"e-learning" 185  
 e-learning environment 242, 259  
 e-learning personalization 225  
 e-mail template 53  
 educational agents 152  
 educational environments 34

evaluation agent 75

## F

facilitator agent design 45, 55  
 faculty office 281  
 federated multiagent systems 16  
 first-class nodes 266  
 FLE 42  
 freedom network 96

## G

Gamma 243, 245  
 Gamma languages 245  
 Gamma program 245  
 Gamma specification 242  
 generic agent (GAg) 2, 18  
 global competition 68  
 group supporting systems (GSSs) 34

## H

heterogeneous learning environments  
 184  
 hierarchical execution environments  
 266  
 hierarchical running environment 242  
 high-level specification 242  
 Higher-Order Gamma 247  
 human collaboration 5  
 human collaborative online learning  
 environment 5  
 human interactions 1  
 human-computer interaction 147

## J

Java virtual machine (JVM) 266  
 judgment algorithm 71

## K

knowledge agent 152  
 knowledge base (KB) 51  
 knowledge management 146, 150  
 knowledge management agent  
 152, 153  
 knowledge query and manipulation  
 language (KQML) 17  
 knowledge server agent 152  
 knowledge-based intelligent support  
 129  
 knowledge-based system 129, 131

## L

learner agent 70, 75  
 learner course agent 201

- learner modeling 200
- learner-centered environments v
- learner's model 220
- learning behavior supervision 287
- learning content agent 70
- learning design 200
- learning environment 1
- learning management systems (LMSs) 2
- "learning object" (LO) 209
- learning object agent (LOA) 210
- learning object repository (LOR) 209, 231
- learning object repository agent (LORA) 211
- learning objects 149
- learning plans 187
- learning social theory 5
- learning technology standards committee (LTSC) 82
- learning technology systems architecture (LTSA) 187
- legacy learning environments 184
- leveraging human collaboration 6
- link database (LINK) 261
- locating agent (LA) 209
- location privacy 81

## M

- machine learning 125
- maintenance agent (MNTN) 261
- MAS-based distributed learning environments 115
- MAS-based DLEs 129
- mediator agent 152
- mentor agent 152
- MGIS support agent 135
- Mindmap building tool 54
- Mindmap program 54
- mobile agents 255
- mobile intelligent agents (MIAs) 228
- monitoring agent (MA) 209
- monitoring agent (MNTR) 260
- multiagent-based educational environment 151
- multiagent framework 218

- multiagent system 231
- multiagent system architecture 2, 15
- multiagent systems (MAS) 194, 259
- multiagent-based e-learning system 242
- multimode integration v
- multiple agent systems (MASs) viii, 116

## N

- Net-based learning environment 34
- network privacy 94
- nondeterministic finite state automata (NFA) 285, 296
- notification agent (NTFC) 205, 260
- notification agent control client (NACC) 260
- notification agent-supported Web service 206
- notifying agent (NA) 209

## O

- one-size-fits-all approach 220
- online communication facilities 273
- ontology-based metadata 140
- open plaza 280
- open system for asynchronous cognitive agents 18

## P

- P3P 86
- P3P exchange language (APPEL) 86
- package interchange file (PIF) 277
- pedagogical agents 35, 37
- pedagogical approach 6
- pedagogical content 189
- pedagogical expert 220
- pedagogical knowledge 176
- pedagogy 200
- perception of the learning process 218
- personal agent (PA) 195, 199, 210
- personal agents for courses 201
- personal computer (PC) 196
- personal digital assistant (PDA) 196
- personalization problem in e-learning 219

PGP 89  
 policy-based management 84  
 policy-based negotiation 140  
 policy-Based trust management systems 89

## Q

quality of service (QoS) vi

## R

radical tailorability 36  
 referee 90  
 reference content 189  
 regulatory agents 197  
 rule-based reasoning 129

## S

scaffolding theory 277  
 secure distributed logs 91  
 self-regulated learning 42  
 semiformal systems 36

sensory-motor skills 147  
 service-oriented computing 212  
 service-oriented institutions vi  
 sharable content object (SCO) 277, 295  
 shared Web communication protocol (SWCP) 285  
 situation awareness skills 147  
 social ability 36  
 social competencies 3  
 Socratic tutor 176  
 software agents 35, 70, 186  
 student agent 153  
 student information agent (STIF) 261  
 student information Web service 206  
 student modeling 125, 128  
 student modeling for personalization 115  
 supervised learning 127  
 symbolic machine learning (SML) 125, 126, 128  
 synchronous learning 164  
 system analysis for agent systems (SAAS) 2

## T

task agent (TA) 196, 199  
 technology advancement 218  
 technology pushing 255  
 terminal agent 233  
 thin client architecture 226  
 third-party provider content 235  
 three-dimensional (3D) virtual campus 273  
 topic tree 261  
 transition rule 249  
 transmission 78  
 trust management 84  
 trust mechanisms for ADL 88  
 trustable user interfaces 103  
 tutor agent 152, 153, 233  
 tutoring knowledge 156  
 two-sigma problem 163

## U

unsupervised SML 127

- user agent 233
- user profile agent 196
- user profile repository 230
- user–personal agent interactions 197

## **V**

- video data transportation 256
- virtual actors 273
- virtual agent system 273
- virtual campus 273
- virtual classroom 256
- virtual library 281
- virtual reality (VR) xi, 278
- virtual reality (VR) technology 273
- virtual university 273
- VR-based motion detection 285
- VR-based virtual agent system 273

## **W**

- Web-based distributed learning 190
- Web-based groupware 42
- Web-based learning management systems 190
- Web-based tutoring system 149
- Web monitoring agent 204, 208
- Web monitoring agent-supported Web service 205
- Web processing 191
- Web services 184, 185, 192, 200
- Web services based approach 192

## **X**

- X.509/PKIX 89
- XML access control language (XACL) 85
