- actions 251
- actors 251
- adaptability 190
- AFrame 320
- agent-oriented requirements engineering 69
- agent-oriented software engineering 69
- agents 69
- air traffic control 245
- architectural frame 320
- artifact lifecycles 204
- artifact management 203
- artifact metadata 203

## B

- bazaar 192
- boundaries 252
- bug reporting guideline 198
- bug reports 196
- bug tracking system 194
- bug triage 199
- Bugzilla 198

## C

- capability maturity model for software 85
- Cartesian method 55
- cathedral 192
- central source code repository (CVS) 194
- change management 3, 160
- change requests 195
- clinical information systems 267
- cognitive task analysis 251
- collaborative RE 190
- collaborative requirements definition 191
- collaborative requirements review 199
- communication perspective 341
- complexity of the organisation 267
- composition 139
- computational aspects 58
- computational model 63
- computer domain 56
- computer-oriented 56
- conceptual model 228
- conceptual modeling 54
- conceptual models 54
- conceptualisation 54

conceptualisation process 55  
 conceptualisation techniques and  
   methods 54  
 content-based retrieval 310  
 cooperative systems 226  
 core developers 194  
 courseware 171  
 courseware architecture 185  
 courseware development 171  
 courseware requirements specification  
   175  
 creative design 245  
 creative system development 267  
 CSCW 227

## D

data gathering 251  
 definition of a conceptualisation 63  
 dependability 139  
 descriptive process model 190  
 discrepancies 60  
 distributed control 140, 141  
 distributed environments 191  
 distributed processing 140  
 drama improvisation 267

## E

educational profile 178  
 efficiency 285  
 electronic patient record (EPR) 266  
 elicitation 38  
 embedded software system 22  
 enhancement requests 196  
 ethnography 228  
 evolution 139  
 explicit knowledge 304  
 eXtreme Programming 88

## F

functional 3

## G

goal-oriented requirements engineering  
   69  
 goals 251

gradual process of software  
   improvement 193  
 groupware 227

## H

handheld computers 267  
 hospital information systems 267  
 human activity modeling 245  
 human/computer interaction 312  
 hypotheses of conceptualisation 55

## I

i\* notation 245  
 implementation domain 58  
 Impression 95  
 incremental approach 101  
 information intensity 267  
 information retrieval 310  
 Information Systems 139  
 information systems 340  
 inspection 160  
 instructional requirements 184  
 integration of autonomous systems 140  
 interaction specification 184

## L

language action perspective 341  
 learning task 171

## M

maintainability 286  
 maturity levels 85  
 medical knowledge 267  
 methodology 226  
 model view controller 320

## N

natural language processing (NLP) 303  
 non-functional 3  
 non-functional requirements (NFR) 285

## O

observational studies 266  
 open source definition (OSD) 191

open source initiative (OSI) 191  
 open source software (OSS) 190  
 organizational 141  
 organizational boundaries 139  
 organizational Failure 141  
 OSS development (OSSD) 190  
 OSS development methodologies 190  
 OSSD process model 192

## P

participatory design 228, 267, 303  
 patch 195  
 patch development cycle 195  
 portability 285  
 prioritisation 101  
 problem diagrams 321  
 problem domain 56  
 problem frames 318, 319  
 problem-oriented 56  
 Problem-sensitive 57  
 problem-sensitivity principle 58

## Q

quality 155  
 quire 95

## R

raw material principle 58  
 RE approaches 23  
 RE challenges 23  
 REAIMS 85  
 regulation 139  
 reliability 286  
 representations 262  
 request tracking method 202  
 request tracking system 202  
 requirement development 3  
 requirement management 3  
 requirements 38, 159  
 requirements allocation and flow-down 4  
 requirements analysis 4, 54, 120, 319  
 requirements definition 190  
 requirements elicitation 267

requirements engineering (RE) 22, 69, 226, 285  
 requirements engineering good practice guide 84  
 requirements engineering process 4  
 requirements engineering process maturity model 84  
 requirements gathering 4  
 requirements management 245  
 requirements management tools 15  
 requirements specification 5  
 requirements validation 3

## S

scenario 245  
 selection 121  
 Skater's principle 58  
 social action 341  
 social sciences 267  
 sociotechnical system 267, 319  
 software development 285, 303  
 software engineering (SE) 190  
 software evaluation 120  
 software evaluation criteria 120  
 software infrastructure 190  
 software process improvement 84  
 software quality 122  
 software requirements development 4  
 software requirements specification 87  
 software support 206  
 solution-sensitive 57  
 special properties 23  
 specification 159  
 stakeholders 155  
 standards 87  
 status attribute 199  
 system design process 267  
 system development 38, 285  
 system goal modeling 245  
 system of systems 141  
 system requirements development 4  
 system requirements development methods 7  
 system use 306

## **T**

tacit knowledge 304  
task analysis 246  
technical products 154  
techniques 38  
traceability 160  
traceability 3  
two ellipse model 319

## **U**

UML 228  
University of Hertfordshire model 84
