

Acknowledgments

The editors would like to acknowledge the help of a number of people who contributed in various ways, without whose support this book could not have been published in its current form. Special thanks go to all the staff at Idea Group, who participated from inception of the initial idea to the final publication of the book. In particular, we acknowledge the efforts of Michele Rossi, Jan Travers and Mehdi Khosrow-Pour for their continuous support during the project.

No book of this nature is possible without the commitment of the authors. We wish to offer our heart-felt thanks to all the authors for their excellent contributions to this book, and for their patience as we went through the revisions. The completion of this book would have been impossible without their dedication.

Most of the authors of chapters also served as referees for chapters written by other authors, and they deserve a special note of thanks. We also would like to acknowledge the efforts of other external reviewers: Zahar Al Aghbhari, Saied Tahaghoghi, A.V. Ratnaike, Timo Volkner, Mingfang Wu, Claudia Schremmer, Santha Sumanasekara, Vincent Oria, Brigitte Kerherve, and Natalie Colineau.

Last but, not the least, we would like to thank CSIRO (Commonwealth Scientific and Industrial Research Organization) and the support from the Commercial group, in particular Pamela Steele, in managing the commercial arrangements and letting us get on with the technical content.

Finally we wish to thank our families for their love and support throughout the project.
