

# **Acknowledgments**

There are many who have contributed to this book, but I'd most like to thank those that gave me encouragement in the early days of the effort. They took their valuable time and struggled through early drafts of this work. These include Steve Krensky, author of more than 70 books, who provided support and insight; Peter Morgan of OpenPages, whose out-of-the-box thinking was of great help; and Dan Gregory, whose experience in the publishing world was helpful. Also, I'd like to thank the team at the Idea Group, who combined a strong process with a desire to enhance knowledge in the industry.
