 cylindrical mapping 278

D

DCT-based quantification 252
 de-rectification 120
 deformable hand-shape templates 180
 deformable model 213
 deformation controller 42
 deformation method 238
 degrees of freedom (DOFs) 3, 73
 delta rule 215
 diffuse reradiation 206
 dilation 307
 diptong 270
 direct linear transformation (DLT) 87, 88
 discrete cosine transform (DCT) 39
 disk-structuring element 186
 disparity map generation 133
 displacer nodes 7
 distance transform 186

distortion center 82
dynamic model 6

E

e-Tailor 351
e-Tailor technical approach 351
edge detection 212
Eigen Light Maps 250
ellipse fitting 143, 147
emotion 176
emotion information 219
emotion wheel 178
emotional body animation 357
emotional dictionary 176
emotional facial animation 357
emotional space 176
emotional speech analysis 356
emotional speech synthesis 356
emotional states 177
emotional video analysis 356
ERMIS project 196
erosion 307
Euclidean geometry 73
Euclidean transformation 73
explicit calibration 78
expression profiles 194
expression recognition 321
extrinsic transform matrix (ETM) 75
eyebrows 307

F

face and body animation (FBA) 29, 33, 178, 346
face animation 204
face detection 183
face model adaptation 297, 298
face model reconstruction 111
face node 33
face parameterisation module 37
face size 308
face space 239, 280
face/body animation parameters (FAP/BAP) 8
face/body animation tables (FAT/BATs) 9

face/body definition parameters (FDP/BDP) 8
facial action coding system (FACS) 179, 217, 220, 238, 297, 320
facial action parameters (FAPs) 112
facial action units (AUs) 213
facial analysis 181
facial animation 204
facial animation parameter (FAP) 8, 34, 179, 213, 239, 246, 253, 299, 357
facial animation tables (FAT) 357
facial definition parameter (FDP) 8, 179, 214
facial deformation modeling 322
facial deformations 268
facial description parameter (FDP) 357
facial expression 204, 235
facial expression modeling 238
facial feature estimation 301, 308
facial feature extraction 183
facial features 179
facial motion & expression image analysis 205
facial motion analysis 320
facial motion data 322
facial motion synthesis 321
facial motion understanding 219
facial muscle distribution 326
FBA compliant data 37
FBA decoder 34
FDP feature points (FPs) 181
feature-based estimation 239
first order left-to-right models 189
focal plane 74
frame 103
fuzzification 195
fuzzy class 194
fuzzy logic 218
fuzzy systems 218

G

Gaussian mixture model (GMM) 217, 321
general purpose processors (GPP) 144
generic head model 272

geometric curves 211
 gesture classes 189
 gesture classification 188
 gesture-activity recognition 130
 global hand motion 180
 global head motion 242
 graph matching 143, 148

H

H-Anim (Humanoid Animation Working Group) 345
 hand and body modeling 342
 hand clapping 189
 hand detection 185
 hand gestures 176
 hand lift 189
 hand localization 180
 head detection 208
 head tracking 203
 heterogeneous networks 29
 Hidden Markov Model (HMM) 143, 148, 181, 217, 320, 322
 hierachic animation 57
 hierarchical, robust scheme 183
 high level facial parameter 356

InfoSci-Online Database

www.infosci-online.com

Provide instant access to the latest offerings of Idea Group Inc. publications in the fields of INFORMATION SCIENCE, TECHNOLOGY and MANAGEMENT

During the past decade, with the advent of telecommunications and the availability of distance learning opportunities, more college and university libraries can now provide access to comprehensive collections of research literature through access to online databases.

The InfoSci-Online database is the most comprehensive collection of *full-text* literature regarding research, trends, technologies, and challenges in the fields of information science, technology and management. This online database consists of over 3000 book chapters, 200+ journal articles, 200+ case studies and over 1,000+ conference proceedings papers from IGI's three imprints (Idea Group Publishing, Information Science Publishing and IRM Press) that can be accessed by users of this database through identifying areas of research interest and keywords.

Contents & Latest Additions:

Unlike the delay that readers face when waiting for the release of print publications, users will find this online database updated as soon as the material becomes available for distribution, providing instant access to the latest literature and research findings published by Idea Group Inc. in the field of information science and technology, in which emerging technologies and innovations are constantly taking place, and where time is of the essence.

The content within this database will be updated by IGI with 1300 new book chapters, 250+ journal articles and case studies and 250+ conference proceedings papers per year, all related to aspects of information, science, technology and management, published by Idea Group Inc. The updates will occur as soon as the material becomes available, even before the publications are sent to print.

InfoSci-Online pricing flexibility allows this database to be an excellent addition to your library, regardless of the size of your institution.

Contact: Ms. Carrie Skovrinskie, InfoSci-Online Project Coordinator, 717-533-8845 (Ext. 14), cskovrinskie@idea-group.com for a 30-day trial subscription to InfoSci-Online.

Multimedia Systems and Content-Based Image Retrieval

Edited by: Sagarmay Deb, Ph.D.
University of Southern Queensland, Australia

Multimedia systems and content-based image retrieval are very important areas of research in computer technology. Numerous research works are being done in these fields at present. These two areas are changing our life-styles because they together cover creation, maintenance, accessing and retrieval of video, audio, image, textual and graphic data. But still several important issues in these areas remain unresolved and further research works are needed to be done for better techniques and applications. **Multimedia Systems and Content-Based Image Retrieval** addresses these unresolved issues and highlights current research.

ISBN: 1-59140-156-9; US\$79.95 h/c • ISBN: 1-59140-265-4; US\$64.95 s/c
eISBN: 1-59140-157-7 • 406 pages • Copyright 2004

"**Multimedia Systems and Context-Based Image Retrieval** contributes to the generation of new and better solutions to relevant issues in multi-media-systems and content-based image retrieval by encouraging researchers to try new approaches mentioned in the book."

—Sagarmay Deb, University of Southern Queensland, Australia
