 architecture 208
 challenges 218, 225
 characteristics 206, 251
 consumer benefits 216
 five model characteristics 144
 provider benefits 216
 reasons to move 2
 ten best practices 61
 vs. grid computing 223
 cloud computing infrastructures 111
 cloud model 144
 for QoS 187
 Coca-Cola Enterprises (CCE) 220
 colocation centers 223
 community support 241
 component-based development (CBD) 74, 107
 component-based source code 53
 component libraries 52
 component-oriented architectures 52
 components 52
 computation independent model (CIM) 30
 configurable 65
 congestion detection interval 191

D

data access model 180
 Data-as-a-Service (DaaS) 209
 data consistency 259
 data-intensive applications 10
 data reengineering 9
 dedicated servers 222
 Denial of Service (DoS) 81
 dependency injection 54
 design erosion - See architectural erosion.
 differentially fed artificial neural network (DANN)
 190

digital payment components 58
 DOMain Elicitation Template (DOMET) 263
 Domain Specific Kits (DSK) 112
 dynamic questionnaire system 285
 dynamic scaling 57

E

ease of use 64
 elasticity 65
 elevation of privileges 81
 Enterprise 2.0 229
 Enterprise Service Bus (ESB) 109, 148, 155, 158, 160, 182
 commonality 158, 162
 variability 161
 exchange mechanisms 51
 extensible frameworks 63

F

Feature Identification 11
 feature modeling 118
 Feature-Oriented Programming (FOP) 29-30
 Flat Transaction Model 249, 256
 four orthogonal properties that any basic reusable component must possess 140
 frameworks 53

G

Gartner's Magic Quadrant 237
 GoGrid 213
 Google 215
 graphical user interfaces 54
 grid computing 211
 vs. cloud computing 223

H

hierarchical model instance sharing 29

I

information disclosure 80
 Infrastructure-as-a-Service (IaaS) 111, 209
 interoperability 143
 intuitive requirements 121
 Inversion of Control (IoC) pattern 54

J

JAsCo component model 165

Java Business Integration (JBI) 161, 185
 JavaScript Object Notation (JSON) 79

L

large scale reuse 112
 legacy systems 3
 call analysis of 6
 modernisation of 3
 types to be migrated 6
 loose coupling 143

M

Message Queuing Middleware (MQM) 161
 metering mechanisms 212
 Microsoft 214
 Microsoft Enterprise Library (MEL) 113
 migration case studies 14
 migration strategies 4
 minimalist 64
 model composition graph instance (MCG instance) 29, 31
 model composition graph (MCG) 28-29, 31
 model composition graph schema (MCG schema) 29, 31
 Model-Driven Architectures (MDA) 29-30
 model expansion 37
 model expansion method 41
 model view controller frameworks 61
 Multi-Architecture Reusable Components 115, 132, 163
 development methodology 121-122, 132
 multi-task adaptive learning (MTL) 281, 289
 multi-tenancy 211

N

Nested Transaction Model 256
 non-relational database model 56

O

object clustering 7
 object orientation 139
 on-demand CRM 234
 online file sharing 206
 on-premise CRM 233

P

partition tolerance 259
 Platform-as-a-Service (PaaS) 111, 209

platform independent model (PIM) 30
platform specific model (PSM) 30
Plausible Justification Tree (PJT) 289
Preserving Causal Dependencies of Expanded Model Instances 39
PRISMA 250, 261
proactive loader 170
product line requirements engineering 258
proxy 174
public on-demand computing model 206

R

Rackspace 213
Random Early Detection (RED) 186-187
reactive loader 170
real memory management (RMM) 45
reengineering user interfaces 8
relational database model 55
Representational State Transfer (REST) 79
repudiation 80
resilience 62
reusable component development 113
