

## Acknowledgment

Special thanks are sent to Dr. John B. Stav with his special contribution leading his team as Conference Co-Chair to enable our dreams to come true, i.e., a successful conference in this challenging area. Thanks also to steering committee and review board members to make significant efforts to maintain a good standard for the book. Thanks also to the contributors of book chapters. Without your brilliant work, the book is not able to be born. Further special thanks to Professor Tim Thornton and Professor Yuanchun Shi, without their contributions for writing the Foreword to the book, the book cannot be complete today. Finally huge thanks sent to the IGI Global team for their strong support, help, guidance, and patience.
