Acknowledgment

A number of people have contributed to the successful completion of this book project. We would like to use this opportunity to express our sincere appreciation to all persons, who provided us with their useful and helpful assistance throughout the last 12 months, in which this book endeavor lasted. Without their consideration and support, this book would most likely not have matured.

First of all, we would like to express our gratitude to all chapter authors for their interest in this book, and the time and effort they invested to go through several revision cycles in order to share their research outcomes with us. We are especially thankful for their patience during the editing and peer-reviewing process, which surely was a quite difficult and time-consuming task. We are extremely thankful for this fruitful collaboration and the confidence they had in us.

We would also like to thank our editorial board members, all renowned experts from academia and industry coming from nine different countries all over the world, for their competent assistance during the editing of this book. Furthermore, we thank our research assistants Luisa Bremen, Simon Himmel, Stefan Ladwig, Johanna Kluge, Oliver Sack, Lena Taube, and Christina Vedar from RWTH Aachen University for their editorial support as well as Christine Bufton, Erica Carter, Myla Harty, Dave de Ricco, and Jan Travers from IGI Global for their fast, professional and sensible assistance throughout the entire publication process.

And last but not least, we would like to thank the board of directors of the Human Technology Center at RWTH Aachen University for financial and organizational support as well as the freedom to work on this project.
