Symbols

3D joint limits 136
 3D joint rotation 81
 3D processing 76
 3D rotation 91
 3D spatio-temporal surface 229

A

abstract hidden Markov model (AHMM) 32
 Acclaim motion capture (AMC) 102
 Acclaim skeleton file (ASF) 102
 action recognition 228, 229, 230, 231, 232, 233, 235, 238, 240, 241
 algorithm 232, 234, 235, 236, 237
 American sign language (ASL) 32, 45
 appearance-based approach 152, 158
 array dereferences 22, 25
 Autogressive Moving Average (ARMA) 190, 231
 automatic human detection 55, 70

B

Baum-Welch algorithm 192
 Bayesian framework 244, 246, 256
 Bayesian Network (BN) 32, 133, 136, 137
 BEHAVE dataset 222, 223, 224, 225
 behavior interpretation 107, 108
 belief propagation 41, 52, 54
 bi-gram decoding schemes 204, 207
 Bi-gram with Global Viterbi Decoding (BGVD) 197, 208
 Bi-gram with Maximum Likelihood Decoding (BMLD) 197, 208
 BN model 140, 141
 bottom-up approach 45, 48

C

color-based model subspace 11
 color-based model tracker 4
 color-based particle filter 1, 2, 3, 4, 11
 common spatial patterns (CSP) 55, 56, 70
 complex multi-scale structure 35
 computer graphics 152
 computer vision 170, 173
 Computer vision algorithms 107
 conditional probability distribution (CPD) 34, 135, 138
 conditional random fields (CRF) 31, 32, 47, 50, 57, 136, 217, 218, 219, 231
 conditional state space models (CSSM) 48
 context-free grammars (CFGs) 32
 contextual information 213
 co-occurrence matrix 120
 correlation-based tracker 120
 coupled hidden Markov model (CHMM) 36, 214
 coupled HMM (CHMM) 46, 219
 covariance matrix 139, 140, 141, 142
 CRF model 218, 219, 225

D

DBN model 142, 143, 149
 DBN tracker 144, 145, 146
 de-noise 83, 95
 de-noising perspective 76
 digital camera 103, 104
 directed acyclic graph (DAG) 33
 Distillation process 244, 245, 246, 247, 252, 257
 Dollar detector 23, 26
 dominant set-based approach 228, 236

dynamic Bayesian network (DBN) 33, 135
 dynamic conditional random field (DCRF) 38
 dynamic time warping (DTW) 190

E

EMD 7, 8
 employ factorial conditional random fields (FCRF) 57
 Euclidian distance
 77, 83, 84, 85, 88, 89, 91
 Euclidian distances 87, 88
 Expectation maximization (EM) 43
 external inhomogeneity 237

F

face recognition system 108
 factorial CRF (FCRF) 48
 Factorial hidden Markov models (FHMM) 36
 Ferns classifier 23, 25
 forward-backward algorithm 193
 frame-based methods 175, 183

G

Gaussian kernel 76, 77, 78, 83
 Gaussian process latent variable model (GPLVM) 134
 GBP algorithm 42
 general features 112, 115, 116, 117, 119
 generalized belief propagation (GBP) 41
 generic mesh model 89, 90, 93
 generic model 75, 76, 89
 Geometry-based 154
 global comparison 7
 global information 17, 18, 30
 global optimization process 7
 global rigid transformations 244, 251
 gradient-descent methods 42
 graphical Model 33
 graphical models 31, 33, 34, 39, 40, 41, 42, 45, 46, 48, 50
 greedy algorithm 19, 21, 22
 Greedy Kernel PCA (GKPCA) algorithm
 74, 76

H

Hallucination 248
 Hausdorff distance 48
 hidden conditional random fields (HCRF) 32, 39, 57
 hidden Markov model (HMM) 31, 32, 33, 35, 57, 187, 188, 191, 155, 214, 217, 219
 hidden semi-Markov model (HSMM) 32, 35, 46
 hidden structure 39
 hierarchial hidden Markov model (HHMM) 32, 35
 hierarchical HMM (HHMM) 46
 hierarchical organization 31, 37
 hierarchical variable transition hidden Markov model (HVT-HMM) 49
 histogram 7, 56, 57, 59, 60, 63, 66, 69
 histograms of oriented silhouette gradients (HOSG) 60, 70
 HMM based approach 190
 HMM framework 193
 HOG-descriptors 68
 HSMM model 35
 HSV color space 7, 11
 Hue-Saturation-Value (HSV) 6
 human action 228, 229, 236, 240, 241, 242
 human action recognition 55, 70, 71, 72, 170, 173, 179, 185, 187, 188, 193, 209, 210, 211, 212
 human actions 152, 155, 158, 163, 166, 168, 173, 186
 human actions modeling 152
 human behavior 55
 human body 173, 180
 human clusters 120
 human-computer interaction 14, 32, 55, 152, 228
 human computer interface (HCI) 187
 human-computer interfaces 55
 human detection 109, 111
 human joint rotations 78
 human model 173
 human motion 74, 75, 76, 77, 79, 80, 82, 94, 96, 98, 99, 101, 102, 103, 170, 179, 184, 185

human motion de-noising 77, 79, 80, 82, 96
Human motion tracking 1, 11
human movement 55, 71
human silhouettes 89, 91
HVT-HMM graphical structure 49

I

intelligent video surveillance 107
interface tools 110
inter-frame image variation 121
internal homogeneity 237
intra-class variation 61, 64

K

kernel functions 162
kernel matrix 83, 85, 93
kernel principal component analysis (KPCA)
48
kernel similarity matrix creation 164
Kernel Subspace Mapping (KSM)
74, 75, 82, 89, 90, 93, 101
kernel trick 83
key-snippets 173
kinematics 187, 188, 190, 194, 197, 212
kinetics 187, 197
KLT feature tracker 3, 8
K-nearest neighbour (KNN) 189
KPCA algorithm 76, 79
KPCA projected vector 77, 83, 106
KPCA silhouette projection 85
KTH data 23, 26
KTH database 179, 184
KTH dataset 24
Kullback-Leibler boosting framework 111

L

Laptev 15, 16, 18, 22, 23, 24, 25, 26, 27,
29, 30
latent Dirichlet allocation (LDA) 189
latent dynamic conditional random fields (LD-
CRF) 32, 39
latent dynamic CRF (LDCRF) 48
layered hidden Markov model (LHMM) 46
LDA method 223
learning-based methods 108, 134

learning-based super-resolution 248
linear discriminant model (LDA) 41, 155, 216,
219
local isometry 86
Local Linear Embedding (LLE) 74, 75
local maxima 23
log-likelihood 33, 36, 43, 44, 45
LOOCV scheme 64

M

machine learning 74, 75, 76, 102
machine learning methods 111
marker-less motion capture system 74
Markov random fields (MRF) 33
Maximum A-Posteriori (MAP) 248
Maximum Entropy Markov Models (MEMM)
57
maximum-likelihood (ML) 248
maximum-likelihood (ML) approach 248
Mean Square Error (MSE) 164
mixture of transformation-invariant component
analyzers (MTCA) 250
Mocap data 47, 48, 50
moment matrix 23
motion-based classifier 17
motion categories 170, 171
motion context (MC) 229
motion energy image (MEI) 188, 229
motion flow history (MFH) 189
motion history image (MHI) 188, 229
Movement-Hold 46
moving-object-based tracking method 108
multi-channel HMMs 35, 40, 41
multi-channel interactions 32, 37, 47
multimedia indexing 108
multiple paths 187, 194, 195, 196
multiple vocabulary trees 17

N

natural framework 31, 50
non-commutative structure 77
non-cyclic actions 195
non-linear dynamic system 166
non-linear motions 1, 2
non-overlapping cameras 125
non-parametric LLE mapping 81, 87, 89

O

Object Of Interest (OOI) 246
 OCR algorithms 109
 one-vs-all 178, 182
 optic flow analysis 158

P

PaHMM framework 46
 pairwise evaluation 55
 Parallel hidden Markov models (PaHMM) 36
 part-based detectors 108
 particle filter framework 1, 4, 11
 pattern recognition 108
 people/face detection 107, 108
 person-detection-based 108
 Point Spread Function (PSF) 246
 pre-image approximations 77, 89, 94
 pre-processing filter 96
 pre-processing stage 155, 159, 164
 principal component analysis (PCA) 75, 76, 190, 229
 Probabilistic graphical model (PGM) 134
 probabilistic latent semantic analysis (pLSA) 18, 189
 propagation algorithm 41

R

real surveillance applications 129
 real world applications 1
 Receiver Operating Characteristic (ROC) 25, 117
 Receiver Operating Characteristic (ROC) curves 117
 reconstruction-based SR 247, 248
 reference target models 1
 region of interest (ROI) 60
 regression method 166
 relative joint centers (RJC) 77, 81, 101
 root mean square (RMS) 254

S

Scale Invariant Feature Transform approach (SIFT) 155
 semantic concepts 32, 46
 semi-Markov model (S-HSMM) 32, 46

semi-naive Bayesian classifier 19, 26
 shape context 228, 230, 231, 232, 233, 236, 241
 signatures 7, 8
 silhouette-based markerless motion 89
 silhouette-based methods 175
 silhouette descriptor 84, 85, 106
 silhouette kernel 81, 83, 84, 85, 87, 106
 silhouette noise 85, 92
 single-frame super-resolution 245, 264
 skeletal's hierarchy 81
 Skeletonisation 174
 Smart Surveillance System (SSS) 109, 129
 space time (ST) 229
 spatial-temporal modeling 166
 spatial-temporal patterns 166
 spatio-temporal corners 23
 spatio-temporal domain 14, 15, 16, 19, 21, 23
 spatio-temporal interest 14, 15, 16, 17, 18, 19, 23, 24, 26, 27, 28
 spatio-temporal interest points (STIP) 189
 spatio-temporal neighbourhoods 17, 18, 21
 spatio-temporal silhouettes 17
 spatio-temporal (ST) 230
 Spatio-temporal templates 57
 SSD detector 146, 149
 statistical methods 2, 11
 statistical model 2
 stochastic context free grammars (SCFG) 32, 44
 stochastic dynamic model 155
 sum-of-squared-distance (SSD) 143
 sum-product algorithm 41
 Support Vector Machine (SVM) 18, 48, 59, 160, 189
 Support Vector Regressors 161, 162
 switching linear dynamic systems (SLDS) 47
 synthetic data 74, 75, 89, 92
 system response 11

T

temporal modeling scheme 160
 theory of inference 31
 tracking-as-recognition approach 48
 tracking modes 11

Index

tree-based reparameterization (TRP) 41
two-dimensional histogram 57

U

Uni-gram with Maximum Likelihood Decoding
(UMLD) 197
unmanned aerial vehicle (UAV) 46
unseen poses 74, 75, 83

V

variable-length Markov models (VLMM) 47,
193
Variable transition hidden Markov models
(VTHMM) 35, 49
VICON marker-based motion capture system
79

video analytics 108
video indexing 245
video repository 110
video retrieval 245
video sequences 133, 147, 149
video summarization 245, 247, 263
video surveillance 14, 55, 245
virtual boundary 110
virtual reality 152
vision-based machines 166
Visual categorisation 170
Visual processing 107
visual words 174
volumetric approach 22
