

Index

A

acquisition phase 56
action teams 240
actual contextual knowledge 119
administrative databases. 175
advanced planner and optimiser (APO)
81, 84
advanced planning and optimisation
(APO) 85
Agency for Healthcare Policy and
Research (AHCPR) 179
analyzed relevance 228
application programming interface (API)
139
architecture of information systems
(ARIS) 96
articulation work 129
artifact-building 5
artifact-evaluation 5
association rules analysis 150
asynchronous delivery 46
Australian ERP marketplace 72
awareness 120
awareness-based ERP methodology
120

B

best business practice reference model
9
“bolt on” solutions 86

broken hill proprietary (BHP) 84
bullwhip effect 23
business application programming
interface (BAPIs) 14
business information warehouse (BW)
81
business warehouse (BW) 84

C

capacity 91
changeability 30
claims databases 175
clinical database 170
closed feedback system 24
cluster analysis 200
clustering algorithms 202
code of ethics for nurses 174
collaborative decision support system
133
collaborative process 121
collaborative resources 121
collaborative semantic concepts 119
collaborative spatial decision making
(CSDM) 133
collaborative spatial decision support
system 139
common object broker architecture
(CORBA) 136
common data repository 9
community-oriented policing 234, 235,
241

compatibility 91
 competing values model (CVM) 2, 5
 complex commercial off-the-shelf (CCOTS) 48
 complex commercial off-the-shelf software (CCOTS) 22, 27
 complexity 91
 component object model (COM) 136
 computerized patient record systems (CPRS) 173
 computer supported cooperative work (CSCW) 120
 conceptual data model 93
 confidentiality 173
 contextual data quality 159, 161
 contextual dimensions 164
 contextual knowledge 119, 121
 contingency factors 5
 control loop OMS 33
 control loop organization 33
 cop on the beat 241
 corresponding measurement criteria 39
 credibility 162
 current procedural terminology (CPT) 176
 customer relationship management (CRM) 81, 91

D

DARPA agent markup language (DAML) 142
 data categorization 187
 data cleaning 187
 data dictionary 134
 data gathering 186
 data layer 98
 data miners 189
 data mining 147, 181
 data model of the enterprise (UDM) 95
 data ownership 174
 data quality 160
 data representation 202
 data standardization 203
 data warehouses 180
 database access middleware 99
 database and knowledge management 235

database management system (DBMS) 175
 database research 178
 decentralized hospital computerized program (DHCP) 179
 decision oriented software development process 34, 36
 Department of Information Engineering 64
 Department of Veterans Affairs (DVA) 179
 determinant to user-adoption 222
 diagnostic related groups (DRGs) 175, 186
 direct relationships 150
 dissimilarity computation 203
 distributed cognition 138
 distributed data warehouse 134
 distributed environment 132
 distributed object technology (DOT) 99
 distributed spatial data warehouse 133
 diverse primary business activities 9
 double-level language 131

E

enterprise application integration 89
 enterprise core 8
 enterprise extensions 8
 enterprise portal 14
 enterprise resource planning (ERP) 1, 2, 22, 27, 54, 97
 enterprise resource planning software (ERP) 29, 48
 enterprise resource planning systems (ERPs) 91, 107
 ERP LifeCycle 55
 ERP market penetration 73
 ERP processes 119
 ERP systems 8
 Euclidean distance 206
 evaluation and comparison of alternatives 66
 event-driven process chains (EPCs) 58
 evolution phase 57
 experienced responsibility 114
 exploratory data analysis (EDA) 200

extraction-transformation-loading (ETL)
98

F

factory data collecting (FDS) 27
factory data collection software (FDC)
28
feasible goals method (FGM) 138
federal geographic data committee
(FGDC) 134
flexibility 31
focus 120
formal evaluation model 64
function layer 98
function model of the enterprise (UFM)
95
functionality 9
future business process model 82

G

geographic information systems (GIS)
132
geography markup language (GML) 141
global ERP industry 72
goods and services tax 81
greenfields 72
growth need strength (GNS) 110, 114

H

health information system (HIS) 179
healthcare 219
healthcare information 171
healthcare records 172
hidden information 150
hierarchical clustering 207
higher education and research category
78
Hong Kong identification card (HKID)
199
hospital authority head office (HAHO)
199
human relations model (HR) 6
human studies subcommittee (HSS)
186
hybrid clustering technique 198

I

implementation 72
implementation phase 56
individual perceptions 159
informatics 171
information flows 9
information paradox 172
information resources management 247
institutional review board (IRB) 186
integrated financial management
systems (IFMS) 108
integrated information processing 95
integration object 92
interactive decision maps (IDM) 138
interactive Web sites 233
interest in police Web sites 243
interface definition language (IDL) 137
interfaces 136
internal process model (IP) 6
international classification of diseases
(ICD9) 175
Internet inter-orb protocol (IIOP) 137
Internet map server 139
Internet usage trends 243
Internet-based technologies 236
interoperability 132, 133
intrinsic data quality 161
IT governance 4
IT-applications 220
IT-diffusion 219
IT-use 219

J

Java database connectivity (JDBC) 99
Java message service (JMS) 99
job diagnostic survey (JDS) 110

K

key-performance-indicator (KPI) 33
knowledge discovery 147
knowledge discovery in databases
(KDD) 181
knowledge management (KM) 84, 120
knowledge warehouse (KW) 81
Köln Integrationsmodell (KIM) 95

L

logical computer based information systems 9
long-term periods 46

M

materials management 10
media creditability 160
Merriam study 238
message oriented middleware (MOM) 99
metadata 134
micro-relevance 219, 222, 223
Middletown Water Services Division 242
mining 147
modularization 44
mutual influence 129

N

negative consequences (problems) 223
nimbus 120
North American Nursing Diagnosis (NANDA) 186
nursing information systems (NISs) 186
nursing minimum data set (NMDS) 185

O

object request broker (ORB) 137
OCE printing systems 25

on-line analytical processing (OLAP) 180
ontology 141
open database connectivity (ODBC) 99
open geodata interoperability specification (OGIS) 133
open GIS consortium (OGC) 133
open systems model (OS) 6
order management systems (OMS) 22, 24, 27, 48
organizational culture shift 236

P

parameterization 44
partitional clustering 209
path analysis 150
patient data quality 198
patient health records 172
patient master index (PMI) 199
personal involvement 159
point associated trade-off techniques (PAT) 138
police Web site usage 246
police/community relations 233
Poplar County criminal justice system (PCCJS) 146
positive consequences (reach goals) 223
potential database problems 177
practice databases 176
presentation layer 98
privacy 173
procedure 10
process map 125
production activity control (PAC) 27, 28
production and Control 10
production planning and control (PAC) 27, 28
proximity matrix 207

R

rational goal model (RG) 6
relative advantage 224
relevance 222
remote method invocation (RMI) 137
remote procedure call (RPC) technique 98
research and development (R&D) 186
resource description framework (RDF) 141
resource poverty 62
responsiveness 31
retirement phase 57

S

sales and distribution 10

SAP 107
SAP service providers 77
SAP university alliance program 75
second wave 72, 81
sequential pattern analysis 150
shared views/shared materials 130
short-term periods 46
situated actions 129
small and medium-sized enterprises
(SMEs) 54
small-medium businesses (SMBs) 75
social psychology 120
spatial data 133
spatial decision-making 132
spinal cord injury (SCI) 169, 184
steady customer demand 24
strategic enterprise management (SEM)
81
supply chain 23
supply chain management (SCM) 27,
29
synchronous delivery 46
system integration 132

T

tacit-explicit knowledge 120
task Identity 112
task outcomes 114
task significance 112
the benefits evaluation ladder 4
transaction processing monitors (TPM)
99

U

uniform hospital discharge data set
(UHDDS) 189
use and maintenance phase 56

V

Veterans Health Administration (VHA)
170, 179
virtual communities 235
virtual offices 236
visualization 138

W

weighting 206
whole system approach 240
word of mouth 162
workflow management (WFM) 27, 29
