Symbols

3G Mobile Information Device (MID 3G)
36

A

access control (AC) 61
ADSL (Asymmetric Digital Subscriber
Line) 59, 63, 79
ASL (Asymmetric Subscriber Loop) 57
alliances 17
application programming interface (API)
127
archive management 159
awareness aggregate 146

B

bandwidth 5, 56
barriers to convergence 37
billing services 190
brand awareness 136
brand communication tools 150
brand equity 135
brand identity 136
brand image 136
branding strategies 135
broadband multimedia PC 37
byte 5

C

cable 78
cable operators 16
capacity 110
CATV (cable networks) 61
chain competition 140
channel content management 158
channels for specific viewer-groups 139
clearing house services 190
communication model 33
conditional access (CA) 69, 126
consultation 106
consultational interactivity 108
consumer attitudes 39
content gatekeeper 129
content manipulation 8
content media management 156
content packaging 8
content processes 192
content production 8
content providers 15
content reception 8
content transmission 8
contract and rights management 189
convergence 1, 31
convergence factor 43
convergence index 47
conversation 105
conversational interactivity 108
cooperative paradigm 25
copyright 180

critical digital mass index 42
 crossover competition 140
 customer gatekeeper 129
 customer relationship management 42

D

DAL—dedicated advertiser location 124
 DBS (direct broadcast satellite) 57
 decoder 67, 111
 delivery management 159
 diffusive systems 97
 digital asset management 158
 digital cable transmission 61
 digital coding 54
 digital compression 55
 digital portals 163
 digital rights management 180, 186
 digital satellite transmission systems
 60
 digital signal 5, 54, 75, 160
 digital technology 53, 75
 digital television 53, 76
 digital television networks types 138
 digital television transmission 90
 digital terrestrial television (DTT) 62, 75
 digital video compression 55
 digitalisation 5
 direct to home (DTH) satellite systems
 77
 Disney channel 142
 distribution costs 91
 downstream 97
 DSL 63
 DTH (direct to home) 57
 DVB—digital video broadcasting 71

E

economic effects of digital transmission
 85
 electromagnetic spectrum 57
 Electronic Programming Guide (EPG)
 70, 117, 147
 end device 35, 126
 enhanced TV 100
 enterprise-wide content management
 158

evoked aggregate 146

F

finance processes 192

G

general channels 139
 general radio packet service (GRPS) 35
 global system mobile communication
 (GSM) 34

H

high definition TV (HDTV) 58

I

ICT (information communication technol-
 ogy) 4
 industry and firm dimension 32
 innovations in Internet-TV convergence
 28
 intellectual property 181
 intellectual property (IP) asset creation
 187
 intellectual property asset delivery
 management 188
 intellectual property media asset
 management 188
 intellectual property rights (IPRs) 181
 interactive advertising 120
 interactive digital television (iDTV) value
 chain 125
 interactive digital television marketplace
 125
 interactive digital TV 197
 interactive games 119
 interactive multimedia services 98
 interactive portal tools 152
 interactive programming 123
 interactive systems 97
 interactive television (iTV) 96, 196
 interactive transmission systems 97
 interactivity 97
 interactivity factor 46
 International Standards Organization
 (ISO) 56

Internet 6
Internet-via-TV 113
intersectorial competition 141
IP multicast 65
IRD (integrated receiver decoder) 61

K

key drivers of convergence 4

L

LNB (low noise block) 61
legislation drivers 6
license management 190
local interactivity 100
local multichannel distribution service (LMDS) 83
local multipoint distribution system (LMDS) 67

M

media asset management (MAM) 159
Mediaset 170
metamarket 1
Metcalf's law 6
middleware 127
migration toward digital TV 168
MMDS (Wireless Cable) 80
mobile information device (MID) 36
Moore's law 5
Motion Picture Experts Group (MPEG) 56
multi-channel network 16
multicasting 124
multichannel microwave distribution system (MMDS) 57
multichannel multipoint distribution system (MMDS) 65
multimedia industry 8
multimedia market 1
multimedia metamarket 12
multimedia service 3, 98
multiplexing 58
multipoint microwave distribution system (MMDS) 59

N

near-video-on-demand (NVOD) 58
needs dimension 32
niche channels 139

O

offline digital TV 37
offline media 34
offline multimedia PC 37
one-way interactivity 100
online digital TV 37
online media 34
online multimedia PC 36
operating systems (OSs) 127

P

parental control 118
pay-per-view (PPV) 58, 61, 118
persistent content protection 190
personal video recording (PVR) 128
pixel 54
portability 76
protection of intellectual property 184

R

reception costs 91
regionality 76
registration 106
registrational interactivity 109
response time 97
return channel (RC) 70
return channel band 97
return path 70, 100
rights information storage 189
rights management processes 192

S

satellite 77
satellite operators 17
satellite platforms 16
set top box 67, 111
Shannon's law 33
smart cards 126
SMATV systems 61

standards 71
standards for video compression 56
subscriber management system (SMS)
126
substitute paradigm 25

T

t-commerce 128
technical vulnerability 76
technology 5
technology dimension 31
television brand 148
terrestrial broadcasters 16
terrestrial TV networks 62
theme channels 58
themed channel 139, 142
transmission 105
transmission costs 91
transmission of a digitised signal 54
transmission systems 59
transmissional interactivity 108
transponders 60
transport media technologies 34
TV banking 122
TV channels 15
TV industry 15
TV shopping 121
two-way interactivity 101

U

universal mobile telecommunication
system (UMTS) 35
upstream 97

V

value chain 12, 189
video-on-demand (VOD) 128
viewers' cognitive system 144

W

wired network 34
wireless application protocol (WAP) 34
wireless cable 65
wireless network 34

Z

zapping 147
