Index

A

a priori information 223
accountability 78
actability evaluation 208
action 92
active realisation of benefits 104
adequacy of the measures 278
adoption rates 2
agile manufacturing 122
agility 118
APS (Advanced Planning and Scheduling) 120
architectural coordination 311
architecture 290
associated target values 277
augmentation 122

B

Balanced Scorecard (BSC) 132, 139, 143
Basic Act on Informatization on Promotion (BAIP) 288
belief degree 225
benefits evaluation ladder 120
benefits management life cycle 101
benefits realization 75, 78, 244
benefits realization approach 78, 82
BPR (Business Process Re-engineering) 119
business performance 57
business processes 258
business programs 80
business relationship 39

C

Capability Maturity Model (CMM) 141, 296
CASE (computer-aided system engineering) 147
case study evaluation 17
chief information officers (CIOs) 75
communication systems 210
compatibility 4
competitive environments 118
complexity 4
component assembly model 262
computerized information systems (ISs) 208
concurrent development model 262
coordination 54
coordination costs 54, 56
correlation models 301
Cost Benefit Analysis (CBA) 120
cost of IT 167
cost-benefit analysis 54
creation 123
Critical Success Factors (CSF) 277
customer measures 141
cybernetics 18

D

data collection anomalies 133
data warehousing 120
DBMS (database management system) 147
decision support systems 121
delivery-time problems 24

Delphi method 35
democratic empowerment 195
deployment of technology 195
diffusion theory 3
digital wavelet transform (DWT) 227
Director of Naval Manpower Planning 299
discounted cash flow 247
DMR Results Chain 80

E

economic indicators 55
economic/financial stream 174
electronic calendars 10
electronic taxation 290
end user groups 1
environmental uncertainty 57
ERP (Enterprise Resource Planning) 120, 313
ERP products 311
evaluation 168
Evaluation and Benefits Management Life Cycle 104
evaluation judgement 182
evaluation of investments 104
evaluation process 290
evolutionary information systems (EIS) 255, 256, 261, 262
evolutionary systems development 261
ex-ante justification 274
external characteristics 151
extrapolation 301

F

FAM rules 222
financial benefits 54
Four "Ares" 86
full cycle governance 78, 88
fuzzy associative memory (FAM) 219

G

globalisation of markets 118
Goal-Question-Metric (GQM) 277
governance process 88
Government Performance Project (GPP) 289
Group Support Systems (GSS) 252

H

hardware 150
Heather Manufacturing Systems (HMS) 22
holistic evaluation model 208
human resource allocation 299
human resource forecasting 304
human resource forecasting model 299

I

improvement actions 284
incremental model 262
individual impact 196
information processing perspective 54
information quality 196
information revolution 135
Information Strategy Plan (ISP) 287
information system (IS) 17, 35, 167, 210, 218, 232, 245, 255, 275, 290, 311
information systems development 17
information systems planning 104
Information Systems Success (ISS) 195, 196
information technology (IT) 62, 75, 101, 167, 245, 255, 287
informatization 287
informatization level 287
innovation theory 3
integrated life cycle of activities 109
internal characteristics 150
internal effectiveness 39
internal labor market 299
internal rate of return 247
Internal Rate of Return (IRR) 120
internal versus external issues (I/E) 39
interpretivism 259
investment decisions 54
IS management 35
IS quality 231
IS/IT investment evaluation 244
IS/IT planning 104
IT (information technology) 146
IT application 277
IT benefits 54
IT evaluation 101
IT evaluation program 274

IT investment decisions 102
IT investments 54, 75, 77
IT outcomes 168
IT perspective 311
IT planning 290
IT productivity 132
IT utilisation 102
IT/IS evaluation 119, 255
IT/IS infrastructure 118, 120

K

knowledge management 132

L

Learning Vector Quantization (LVQ) 219
linkage 138
Local Area Network (LAN) 293
longitudinal data 54
LVQ Training 224

M

management agenda 285
management environment 148
management functions 62
management information 23
management science research 17
management versus technology issues (M/T) 39
manpower forecasting 300
matrix 4
measure 256
measurement 78
