

### **Acknowledgments**

The editors would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed. A further special note of thanks goes also to all the staff at Idea Group Publishing, whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable.

Most of the authors of chapters included in this also book served as referees for articles written by other authors. Thanks go to all those who provided constructive and comprehensive reviews. Support of the Basser Department of Computer Science of the University of Sydney and the Institute of Information and Mathematical Sciences of Massey University of New Zealand operations is acknowledged.

Special thanks also go to the publishing team at Idea Group Publishing. In particular to Jan Travers, who continuously prodded via e-mail for keeping the project on schedule and to Mehdi Khosrowpour, whose enthusiasm motivated me to initially accept his invitation for taking on this project.

In closing, I wish to thank all of the authors for their insights and excellent contributions to this book. I also want to thank all of the people who assisted me in the reviewing process. In addition, this book would not have been possible without the ongoing professional support from Mehdi Khosrowpour and Jan Travers at Idea Group Publishing.
