

## Acknowledgment

Overcoming the challenge of organizing a book like the one we bring here would not be possible without the help of many professionals. From the decision of editing it until having the book published, we received the worthwhile support from people for whom we owe the success of this enterprise.

First, we are grateful for our Editorial Board that helped in defining the topics comprised in the book, in identifying prospective chapter authors, and in pointing out reviewers able to find among the many good proposals received those that compose the final manuscript.

Next, we would like to express our gratitude to Edilson Ferneda, Eduardo Delgado Assad, Eliane Gonçalves Gomes, Eliseu Roberto de Andrade Alves, Fernando Luis Garagorry, Geraldo da Silva e Souza, Paulo Martins Engel, Sandro da Silva Camargo, and Otávio Valentim Balsadi that, along with the editors, evaluated the proposals and helped in selecting the final book content.

Finally, we are grateful to the IGI Global team, particularly to Joel Gamon, who provided the fundamental support to develop, step by step, this project.
