

Index

A

activity-based descriptions 232
adaptive network-based fuzzy inference
 systems 179
agency theory 294
agent-based models 80
ANN architecture 10
ANN generalization 9
arc reversal 69
artificial market 100
artificial neural network (ANN) 2, 35
asymmetric information 150
asymmetric market 89

B

barren node removal 69
basket options 35
Bayesian networks 65
Bayesian theory 65
behavioral analysis 168
binomial trees 36
bounded rationality 153
brokerage industry 120

C

capital controls 235, 241, 243
capital restrictions 238
coevolutionary genetic algorithm 105
computer simulations 207
conditional expectation 69
constant relative risk aversion (CRRA)
 3
cost estimation 184
criminal justice system 229
crossover 16, 106

D

decision 218
decision making 152
decision support 63
development fundamentals 208
discrete wavelet transform 35
double auction 80

E

electronic exchanges 121
electronic traders 119
energy uncertainty 280
engine testing 179

exchange controls 253
 execution uncertainty 280

F

financial environment 218
 flat-supply double auction market 94
 foreign direct investment (FDI) 236
 fuzzy systems 181

G

genetic algorithm (GA) 2, 35
 genetic operators 106
 genetic training optimization 16
 GIS network data 173

H

heuristic-data mining 218
 hybrid agents 218
 hybrid modeling 232
 hybrid-decision support system (HDSS) 218

I

inadequate management techniques 206
 inference methods 68
 influence diagram 64
 inter-organizational strategic alliance 291

K

known structure, complete data 70
 known structure, incomplete data 70

L

learning 150
 lemons markets 157
 linear correlation 35
 local attractors 113
 locally linear embedding (LLE) 180

M

macrolevel 109
 market efficiency 81

market making 119
 market microstructure 120
 mathematical physics of organizations 269
 mathematical physics of uncertainty 271
 methodological individualism 269
 microlevel 103
 minimal intelligence 80
 mistake-avoidance techniques 208
 multi-agent 229
 multi-agent game 164
 multimarket speculators 83
 multinational enterprise (MNE) 236
 multiple-spot mutation 106

N

naive model 152
 neural networks (NN) 179

O

on-off exchange controls 252
 optimal bidder behavior 151
 optimal population 107
 option pricing 45
 organizational science 269

P

PCA 180
 penny jumping 130
 performance evaluation criteria 14
 policy optimization 101
 population 106
 portfolio optimization 103
 postprocessing 29
 power-law scaling 107
 price convergence rate 82
 price forecasting 13
 principal component analysis (PCA) 180
 project management 206

R

radial basis functions estimators (RBFN) 180

reinforcement 150
reinforcement learning 164
risk management 35, 208
RiskMetrics™ 36

S

scaled proportional fitness selection
107
schedule-control 208
simulation design and results 155
software project 208
SPM 206
static lagrange multipliers 103
statistical techniques 119
strategy uncertainty 280
strictly maximal elements 107
symmetric market 88

T

technology transfers 236
test suites report 231
time horizons 4
time uncertainty 280
trading strategy 5
traffic networks 162
traffic user equilibrium 163

U

uncertainty 271
unknown structure, complete data 70
unknown structure, incomplete data 70
user requirements 231
Utility Functions 4

V

visualization 229

W

wavelet correlation measure 37
wavelet filtering 35
wavelet thresholding 35
wavelets 47

Z

zero intelligence traders 82
zero-intelligent plus traders 83
ZIP traders 88
