Fuzzy environment 299

G

Genetic algorithm 294
global business environment 140, 205
green supply chain management 94, 150, 158, 166, 169-170, 174, 235, 246

H

Hedging Corridor policy (HCP) 292
Heuristic decomposition techniques 78
Hugos model 9
Hybrid Scenario 224

I

imperfect competition type 216
information disruption 206
insourcing 36
Integrated circuits (ICs) 80
Integrated Sustainable Supply Chain index (Issc) 242
 Normalization 242
inventory-distribution 53-54, 197
Inventory Management 53

J

JELS model 55-56
JELS problem 55-56
joint economic lot sizing problem (JELS) 55
joint replenishment problem (JRP) 59
Just-In-Time (JIT) 58

L

lagrangian dual problem 253
Lagrangian Relaxation method 78, 258
Lagrangian Relaxation models 117
Leagile paradigm 162

Life cycle analyses (LCA) 236
Linear / Nonlinear demand function 221, 223
Linear Programming model 120, 190
linear regression (LR) 266
Local simulation paradigm 292
Location Selection 23, 34
Log-separable demand model 221

M

Make-and-Buy Decisions 187
make-or-buy decision 35
make-or-buy question 35
make-to-order (MTO) system 159
make-to-stock (MTS) system 159
Market and Supply Allocation 23, 34
maturity level 82, 84
McIvor model 37
Mixed Integer Linear Programming (MILP) 117
Mixed Integer Nonlinear Programming (MINLP) 117
Mixed Integer Programming (MIP) 117, 296
model predictive control (MPC) 292
monopoly 216
Multi-channel Cooperation in Supply Chains 91
Multi Criteria Decision Making (MCDM) 241
Multi-Level, Multi-item Capacitated Lot Sizing Problem (MLCLSP) 78

N

Nash equilibrium 287
Net Marginal Gain (NMG) 292
Neuro-fuzzy - See adaptive neuro-fuzzy inference system.
New Public-Private Partnership Trend 87
nonanticipativity constraint 252

O

oligopoly market 216
operational and disruption risks - See supply chain risk sources
operations research and management science (ORMS) 292
optimization models 20-21, 189-190, 247
outsource-or-insource decision 36-37
outsourcing 36
