

Acknowledgments

We owe a great debt of gratitude to the authors of the “country chapters.” All of the authors, experts on mobile communications and mobile commerce in their own rights, exhibited patience and cooperation in terms of accepting and incorporating feedback from the reviewers and the editors. We have provided short profiles of the authors featured in this book, the country chapter authors as well as the three editors, in the section entitled “Contributors.”

The institutions where the editors are located, as well as the institutions and companies that the chapter authors belong to, have all provided strong support for the research efforts that form the bases of the chapters. As editors of this volume, we would also like to acknowledge the very professional assistance provided by Kristin Roth of Idea Group Publishing throughout the entire publication process.
