Zongwei Luo (The University of Hong Kong, Hong Kong)

Trends in green and sustainable development have and will continue to influence all major economies. Identifying the risks and opportunities associated with sustainable economic development and green analysis for sustainability warrants the use and study of advanced analytics.

*Advanced Analytics for Green and Sustainable Economic Development: Supply Chain Models and Financial Technologies* focuses on the development of innovative techniques and tools that answer urgent questions in the global trend of sustainable economic development. This book will be useful to professionals, researchers, and policymakers working in various disciplines including business and economy, science and engineering, social sciences, government policy, and legal studies. Chapters in this work also provide a valuable resource for business managers concerned with the development of green business and application of low carbon practices.

**Topics Covered:**
- Bike Transportation System Design
- Carbon Markets and Investments
- Closed Loop Supply Chain Systems
- Data Center Technology Roadmap
- Global Financial Sector Alternatives
- Low Carbon Economy
- Renewable Energy Investment Strategies
- Transition Management

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Zongwei Luo is a senior researcher at the E-business Technology Institute, The University of Hong Kong (China). He is the founding Editor-in-Chief of the *International Journal of Applied Logistics* and serves as an associate editor and/or editorial advisory board member in many international journals. Dr. Luo's recent interests include applied research and development in the area of service science and computing, innovation management and sustainable development, technology adoption and risk management, and e-business model and practices, especially for logistics and supply chain management.
Chapter 1
Low Carbon Economy-Finance and Technology Models
Sureshkukar S. (National Institute for Interdisciplinary Science and Technology, India)

Chapter 2
Carbon Markets and Investments
Zambujal-Oliveira J. (Technical University of Lisbon, Portugal)

Chapter 3
Firms’ Banking and Pooling in the EU ETS (2005-2007)
Chevallier Julien (Université Paris Dauphine, France)
Etner Johanna (Université Paris Descartes & ESG Management School, France)
Jouvet Pierre-André (Université Paris Ouest Nanterre La Défense, France)

Chapter 4
Mind the Gap Please!
Wong Sam (University of Liverpool, UK)

Chapter 5
Alternatives to the Global Financial System
Adams Carl (University of Portsmouth, UK)
Mozart Simon (Southampton Solent University, UK)

Chapter 6
Low Carbon Economy and Developing Countries
Bista Raghu Bir (Tribhuvan University, Nepal)

Chapter 7
Transition to Low-Carbon Hydrogen Economy in America
Lam Jacqueline C.K. (The University of Hong Kong, China)
Hills Peter (The University of Hong Kong, China)

Chapter 8
Operational Hedging Strategies to Overcome Financial Constraints during Clean Technology Start-Up and Growth
Erzurumlu S. Sinan (Babson College, USA)
Tannisee Fehmi (Eindhoven University of Technology, The Netherlands)
Joglekar Nitin (Boston University, USA)

Chapter 9
Warehouse Financing Risk Analysis and Measurement with Case Study in Carbon Trading
Yin Ying (The University of Hong Kong, China)
Luo Zongwei (The University of Hong Kong, China)

Chapter 10
Modeling Closed Loop Supply Chain Systems
Poles Roberto (University of Melbourne, Australia)

Chapter 11
Bike Transportation System Design
Gill Avninder (Thompson Rivers University, Canada)

Chapter 12
Data Center Technology Roadmap
Daim Tugral (Portland State University, USA)
Anderson Timothy R. (Portland State University, USA)
Thirumalai Mukundan (Portland State University, USA)
Subramanian Ganesh (Portland State University, USA)
Katarya Neelu (Portland State University, USA)
Singh Neelu (Portland State University, USA)
