Patient Safety and Quality Care through Health Informatics

Part of the Advances in Healthcare Information Systems and Administration Book Series

Vaughan Michell (University of Reading, UK), Deborah J. Rosenorn-Lanng (Royal Berkshire Hospital Foundation Trust Reading, UK), Stephen R. Gulliver (University of Reading, UK), and Wendy Currie (Audencia, Ecole de Management, Nantes, France)

Medical and health activities can greatly benefit from the effective use of health informatics. By capturing, processing, and disseminating information to the correct systems and processes, decision-making can be more successful and quality care and patient safety would see significant improvements.

Patient Safety and Quality Care through Health Informatics highlights current research and trends from both professionals and researchers on health informatics as applied to the needs of patient safety and quality care. Bringing together theory and practical approaches for patient needs, this book is essential for educators and trainers at multiple experience levels in the fields of medicine and medical informatics.

Topics Covered:
- Patient Safety
- Human Factors
- Analysis Tools
- Health Enterprise Architectures
- Health Policies
- Mobile Telecoms
- Pervasive Informatics

Print: US $365.00  |  Perpetual: US $550.00  |  Print + Perpetual: US $730.00

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

Publishing Academic Excellence at the Pace of Technology Since 1988
