

EDITORIAL PREFACE

Nik Bessis, University of Derby and University of Bedfordshire, UK

The third issue of the second volume is dedicated to the new trends and challenges in large-Scale Networking and Distributed Systems and their applications.

This special issue follows the 4th CI-SIS-2010 conference (4th International Conference on Complex, Intelligent and Software Intensive Systems, February, 15-18, 2010,

Andrzej Frycz Modrzewski Cracow College, Krakow, Poland).

My sincere thanks go to the guest editor and also to the authors of this special issue.

*Nik Bessis
Editor-in-Chief
IJDST*

Nik Bessis is a full Professor of Computer Science at the School of Computing and Mathematics at University of Derby, UK. Nik is also a permanent academic staff member of the Department of Computer Science and Technology at the University of Bedfordshire, UK. His research interest has a particular focus on the applicability of next generation distributed data technologies including grids, clouds and crowd sourcing for the benefit of various virtual organisational settings. He is involved in and leading a number of funded projects in these areas. Professor Bessis has published numerous papers in international conferences and journals, served as a reviewer, program committee member, session chair, associate editor, conferences and workshops chair, editor of three books and the Editor-in-Chief of the International Journal of Distributed Systems and Technologies.
