Best Practices and New Perspectives in Service Science and Management

Patricia Ordóñez de Pablos (Universidad de Oviedo, Spain) and Robert Tennyson (University of Minnesota, USA)

Within global commerce, services and management play a vital role in the economy. Service systems are necessary for organizations, and a multi-disciplinary approach is ideal to establish full understanding of these systems.

Best Practices and New Perspectives in Service Science and Management provides original research on all aspects of service science, service management, service engineering, and its supporting technology in order to administer cutting-edge knowledge to encourage the improvement of services. This book is essential for researchers and practitioners in the fields of computer science, software management, and engineering.

Topics Covered:
- Computational Techniques
- Economic Aspects
- Human Capital Management
- Service Business Models
- Service Innovation
- Service Sector

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners, and is ideal for classroom use.
