

Information Visualization Techniques in the Social Sciences and Humanities

Part of the Advances in Human and Social Aspects of Technology Book Series

Veslava Osinska (Nicolaus Copernicus University, Poland) and
Grzegorz Osinski (College of Social and Media Culture, Poland)

Description:

The representation of abstract data and ideas can be a difficult and tedious task to handle when learning new concepts; however, the advances in emerging technology have allowed for new methods of representing such conceptual data.

Information Visualization Techniques in the Social Sciences and Humanities

is a critical scholarly resource that examines the application of information visualization in the social sciences and humanities. Featuring coverage on a broad range of topics such as social network analysis, complex systems, and visualization aesthetics, this book is geared towards professionals, students, and researchers seeking current research on information visualization.
