The **International Journal of Information Retrieval Research (IJIRR)** publishes original, innovative, and creative research in the retrieval of information. This journal focuses on theories and methods with an enterprise-wide perspective and addresses interdisciplinary and multidisciplinary applications in data, text, and document retrieval. Targeting information engineers, scientists, and related professionals, IJIRR integrates interdisciplinary and multidisciplinary needs for a complete approach to the significant issue of data retrieval in the era of information fusion.

Topics Covered:

- Advanced software development related information retrieval issues
- Classification
- Clustering approaches
- Content and context awareness and environment awareness
- Filtering system
- Index techniques
- Information mining
- Information retrieval
- Knowledge mining
- Link analysis
- Machine learning on documents
- Message passing
- Metadata and XML retrieval
- Mobile computing related information retrieval issues
- Multimedia retrieval
- Performance measures
- Query languages and optimization
- Retrieval architecture
- Retrieval evaluation
- Retrieval languages and operations
- Retrieval strategies
- Retrieval systems
- Retrieval theories
- Retrieval with Big data technologies
- Scalability
- Search algorithms
- Search engine
- Social media related information retrieval issues
- Taxonomy theory and applications
- Text Mining
- Text, document, and image retrieval
- Web Mining

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com/publish/resources prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:

EDITOR-IN-CHIEF BIO

Zhongyu (Joan) Lu is Professor in Informatics at the University of Huddersfield (UK). Her extensive research covers information access, retrieval and visualization, XML technology, object oriented technologies, agent technology, data management systems, security issues and Internet computing. She has been an invited speaker for industrial-oriented events and published 5 academic books and more than 160 papers. Professor Lu has acted as the founder and a program chair for the International XML Technology workshop and XMLTech (USA) for 11 years (2003-2011). She also serves as Chair of 5 separate international conferences, is a regular reviewer for several international journals, and a committee member for 16 international conferences. She specializes in XML technology and mobile computing with image retrieval through the latest wireless devices. Professor Lu serves as a member of the British Computer Society (BCS), BCS examiner of Advanced Database Management Systems, and fellow of the Higher Education Academy (UK). She is a founder and Editor-in-Chief for the *International Journal of Information Retrieval Research*.
