Encyclopedia of E-Health and Telemedicine

Maria Manuela Cruz-Cunha (Polytechnic Institute of Câvado and Ave, Portugal & Algoritmi Research Centre, Portugal), Isabel Maria Miranda (Câmara Municipal de Guimarães, Portugal), Ricardo Martinho (Polytechnic Institute of Leiria, Portugal & CINTESIS - Center for Research in Health Technologies and Information Systems, Portugal) and Rui Rijo (Polytechnic Institute of Leiria, Portugal & INESCC - Institute for Systems and Computers Engineering at Coimbra, Portugal & CINTESIS - Center for Research in Health Technologies and Information Systems, Portugal)

Description:

Patients and medical professionals alike are slowly growing into the digital advances that are revolutionizing the ways that medical records are maintained in addition to the delivery of healthcare services. As technology continues to advance, so do the applications of technological innovation within the healthcare sector.

The Encyclopedia of E-Health and Telemedicine is an authoritative reference source featuring emerging technological developments and solutions within the field of medicine. Emphasizes critical research-based articles on digital trends, including big data, mobile applications, electronic records management, and data privacy, and how these trends are being applied within the healthcare sector.

Readers:

This encyclopedia is a critical addition to academic and medical libraries and meets the research needs of healthcare professionals, researchers, and medical students.

ISBN: 9781466699786  Release Date: April, 2016  Copyright: 2016  Pages: 1,225

Topics Covered:

- Cyber-Physical Systems
- Electronic Health Records
- Gamification
- Health Monitoring
- Home Healthcare
- M-Health
- Medical Devices
- Medical Imaging
- Security and Privacy
- Technology-Assisted Medical Education
- TeleHealth

Hardcover + Free E-Access: $1,350.00  E-Access + Free Hardcover: $1,350.00  1 Year Online Subscription: $630.00  2 Year Online Subscription: $1,060.00

# Table of Contents

## Section I – Case Studies

1. The Acceptability of Teleconsultations in Teledentistry: A Case Study (1811114-081740)
3. The Chronic Related Groups Program: A Case Study (250814-085545)
4. E-health adoption by healthcare organizations in developing countries: Case of Morocco (040814-093609)
5. eHealth and Organizational Change in Hospital Setting: A Case Study on Electronic Health Records (240914-125321)
6. Georgian Experience in Telectogy (150914-055417)
7. Optimizing hearing aid utilisation using telemedicine tools (300914-074130)
8. Promoting Training Transfer for Quality Telehealth Provision (301014-035306)
9. Telemedicine Based on LMDS in the Urban / Metropolitan Area: A Romanian Case Study (271014-024300)

## Section II – Developments and Solutions

10. Assessing mobile applications considered medical devices (051114-064751)
11. Design and Build a Wizard of Oz (WOZ) Telemedicine Simulator Platform (210914-124317)
12. Design of a Simulation Device to Test Electrocardiography (EGG) Systems (280914-082949)
13. E-Health Business Models (030914-092624)
14. The emergence of biobanks: Between ethics, risks and governance (311014-052221)
15. Exerci@rt, an integrated web and mobile app for COPD management (300914-101829)
16. Functional Software Prototypes for Defining and Monitoring Individual Exercise Program (040814-031557)
17. Gelapark: Parkinson’s Diagnosis Support System (300914-037004)
19. Impact of B2B E-Commerce and Supply Chain Investments in Hospitals (130714-024724)
20. Including elderly patients in decision making via electronic health literacy (010114-084845)
21. Internet Accessibility for Visually Impaired (301014-084826)
22. An Interoperative and Standard-Based End-to-End Remote Patient Monitoring System (290914-110901)
23. Neuropsychology Rehabilitation: An Overview (300914-061509)
24. An Overview About the Use of Healthcare Applications on Mobile Devices (130914-124020)
25. Pharmacovigilance Informatics (291014-025742)
26. Promoting Lifestyle Change through Medical Avatars (301014-021432)
27. Prototype Implementation and Automatic Determination of Pre-transfusion Tests Based on Image Processing (300914-033616)

## Section III – Emerging Technologies

28. Augmented reality in healthcare (290914-085143)
30. Characteristics of elderly viewers and their automatic identification in TV healthcare services (311014-082126)
31. Computer-based Neuropsychological Rehabilitation: Virtual Reality and Serious Games (290914-050751)
32. Computerized Decision Support Systems for Multimorbidity Care: An Urgent Call for Research and Development (311014-052252)
33. Content Based Image Retrieval (CBIR) in Remote Clinical Diagnosis and Healthcare (221214-01755)
34. Controlled Flexibility in Healthcare Processes: A BPMN-extension Approach (300715-120741)
35. Distance Education in Telemedicine and mHealth Initiatives in Therapeutic Patient Education (140714-080357)
36. E-Health and Psychology, Self-Regulation to Help Software Design (301014-062251)
37. Electronic Health Record Portals Definition and Usage (300914-083449)
38. Embedded Sensor Systems for Health in Home Healthcare: Enablers and Challenges (260914-091133)
39. Health information System to Identify Dermatological Diseases by Software Agent (290914-073857)
40. An Holistic Infrastructure to Support Elders’ Independent Living (260814-044152)
41. Information and Communication Technology for Mental Health: A systematic literature review (050614-022542)
42. Integrated care in Europe. New models of management of chronic patients (111214-070446)
43. Internet and Social Network as Health/Physical Activity Information Sources (210114-081311)
44. ISO/IEEE 11073 Family of Standards: Trends and Applications on e-Health Monitoring (260914-092297)
45. Latte Logic Accommodating the WHO Family of International Classifications (011114-034734)
46. Learning ICT-mediated Communication through Computer-based Simulations (311014-075527)
47. Multi-Agent Systems for E-Health and Telemedicine (20914-085608)
48. Neuropsychiatric Assessment from Traditional to ICT based Instruments (300914-071900)
49. Non-Intrusive Health-Monitoring Devices (261114-043359)
51. An Overview of Serious Games in Cognitive Rehabilitation (270914-071334)
52. Possibilities of a Body-Region Separately Weighing System in Healthcare (280914-093650)
53. Rare diseases Internet Information Retrieval and Knowledge Discovery (301014-013117)
54. Recent Advances in Micropromoting Technology (021214-050107)
55. Remote Patient Monitoring Technologies (171214-122734)
56. A Review of Existing Applications and Techniques for Narrative Text Analysis in Electronic Medical Records (211114-065840)
57. The Role of Audio in two Accessible Vision-Rehabilitation Games for Blind Teenage Users (301014-035402)
58. Simulation for Medical Training (300914-113103)
59. Towards a framework for measuring eHealth status across the world (220914-055037)
60. Towards Interoperable and Extendable Clinical Pedigrees in Healthcare Information Systems (290914-103110)
61. Understanding Customer Behavior Through Collaboration RFM Analysis and Data Mining Using Health Life Center Data (311014-125830)
62. Using Big Data in Healthcare (290914-120451)

## Section IV - New challenges and issues

63. The decision-making processes of pregnant women at high risk (060814-053630)
64. Digital auscultation – Challenges and Perspectives (301014-052131)
65. E-Mental Health - Contributions, Challenges and Research Opportunities from a Computer Science Perspective (301014-080033)
66. The European Union Legal Framework on E-Health, Telemedicine and Privacy (301014-01117)
67. An investigation into doctors’ perceptions of internet informed patients (300914-064402)
68. Issues in Telemedicine Service: Acceptance and Willingness (170914-040348)
69. Opportunities and Challenges for Electronic Health Record: Concepts, Costs, Benefits and Regulation (311014-063232)
70. Opportunities and threats for e-health on an ageing society (291014-065341)
71. An Overview and a Future Perspective in Health Information Systems in Portugal (300914-025939)
72. Rethinking ICTs and E-Health: A Focus on Issues and Challenges (150914-021342)
73. The role of gender in Technology Acceptance for Medical Education (280914-122101)
74. The Role of Tailoring in E-Health and ICT-Based Interventions in Different Contexts and Populations (141214-071100)
75. Smartphones: Innovative Tools in Cancer Prevention (290914-033816)
76. SmarTV Care. Benefits and Implications of Smart TVs in Health Care (271014-114231)
77. Tele-Care Mobile Sensing Systems: Technical and Social Barriers (271014-073319)
78. The Worker’s Perspective in Telehealth (300914-062330)
79. Toward a Critically Conscious and Culturally Competent Telepractice in Psychology (071014-094628)

81. Trust and credibility perception in e-Health: Interface contributes (270914-073707)
82. Verification and Validation of Medical Cyber-Physical Systems (290914-012132)

Maria Manuela Cruz-Cunha is a Professor of Information Systems and Project Management at the Polytechnic Institute of Câvado and Ave, Portugal. She holds a Dipl. Eng. (5 years) in Systems and Informatics Engineering, an M.Sc. in Computer Integrated Manufacturing and a Dr. Sci in Production Systems Engineering. She teaches subjects related with Information Systems, Information Technologies, IT Project Management and Organizational Models to undergraduate and post-graduate studies. She has authored and edited 25 books and her work appears in more than 150 papers published in journals, book chapters and conference proceedings. She is founder and conference chair of the "CENTERIS — Conference on ENTERprise Information Systems”, "VINOrg — Conference on Virtual and Networked Organizations Emergent Technologies and Tools” and "ProjMAN — International Conference on Project Management”.

Isabel Maria Miranda is currently the responsible by the Social Services Division of the City Council of Guimarães. She has previously worked as coordinator of continuing education projects at the University of Porto, and simultaneously as lecturer of Management and Social Sciences at higher education institutions. She holds a 5-year degree in Psychology and a Master degree in Psychology of Organizations. Her scientific interests are related with health and social care Information Systems and Technologies.

Ricardo Martinho is an Associate Professor at the School of Technology and Management – Polytechnic Institute of Leiria, Portugal. He teaches several subjects related to enterprise information systems, enterprise application development, software engineering (agile methods) and health information systems. He graduated in Electrical Engineering – Computer Science at University of Coimbra, received his MSc in Computer Science - Information Systems Programming from IST - Technical University of Lisbon, and his PhD from University of Trás-os-Montes and Alto Douro. He is currently the Head of the Healthcare Informatics BSc. degree, and participates as a consultant in several enterprise and health informatics-related research projects. He supervises several MSc and PhD theses in the Computer Science – Health Informatics research areas. He has several publications in conference proceedings, book chapters and journals, related to the Business Process Management, Software Engineering and health informatics research areas. He serves as editor-in-chief, member of editorial board and reviewer for several books and international journals, and has served in several committees of international conferences. He is a co-founder of HCist – International Conference on Health and Social Care Information Systems and Technologies (http://hcist.scika.org).

Rui Rio is Professor of Computer Science at the Polytechnic Institute of Leiria. He received his PhD in Computer Science from the Trás-os-Montes University and his Engineering degree from Instituto Superior Técnico (Technical University of Lisbon). He has more than ten years of experience as senior information systems consultant in, among others countries, Tokyo (Japan), Macau (China), Hong Kong (China), Sao Paulo (Brazil), Kuala Lumpur (Malaysia), Madrid (Spain), Amsterdam (Holland), Madrid (Spain) and Lisbon (Portugal). His publications include book chapters and papers in refereed national and international conferences and journals. He was general chair of HCist - International Conference on Health and Social Care Information Systems and Technologies and associate editor of the International Journal of Web Portals and editor of the International Journal of E-Health and Medical Communications. He was the coordinator of the Healthcare Informatics course and currently is the coordinator of the Master on Healthcare Information Systems Management. His current research interests include project management, software engineer, and health information systems. His current research interests include health information systems, patient relationship management, serious games and project management.
