Ethics in Research Practice and Innovation

Part of the Advances in Library and Information Science Book Series

Antonio Sandu (Stefan cel Mare University of Suceava, Romania), Ana Frunza (LUMEN Research Center in Social and Humanistic Sciences, Romania) and Elena Unguru (University of Oradea, Romania)

Description:
A particularly important component of any research project is its ethical dimensions which can refer to varied categories of practice – from the protection of human subjects involved in medical and social research to the publication of results research. More recently, with the estimation of the possible consequences of the implementation of technology, it is important for today’s researchers to address the standards of scientific practice and avoid unethical behavior.

Ethics in Research Practice and Innovation is an essential reference source that discusses current and historical aspects of ethical values in scientific research and technologies, as well as emerging perspectives of conducting ethical research in a variety of fields. Featuring research on topics such as clinical trials, human subjects, and informed consent, this book is ideally designed for practitioners, medical professionals, nurses, researchers, scientists, scholars, academicians, policy makers, and students seeking coverage on the ethical risks and limitations of research practice.

Topics Covered:

- Clinical Trials
- Ethics of Risk
- Family Research
- Human Subjects
- Informed Consent
- Misconduct
- Organizational Criminology
- Psychiatry
- Research Integrity
- Risk-Benefit Evaluation
- Shared Responsibility
