

International Journal of Business Data Communications and Networking (IJBDNCN)

ISSN: 1548-0631; EISSN: 1548-064X
Established 2005; Published Semi-Annually

Editor(s)-in-Chief: Zoubir Mammeri (IRIT - Paul Sabatier University, France)

The International Journal of Business Data Communications and Networking (IJBDNCN) examines the impact of data communications and networking technologies, policies, and management on business organizations, capturing their effect on IT-enabled management practices. This journal includes analytical and empirical research articles, business case studies, and surveys that provide solutions and insight into challenges facing telecommunication service providers, equipment manufacturers, enterprise users, and policy makers. IJBDNCN covers the principles of both wired and wireless communications of voice, data, images, and video and the impact of their business values on the organizations in which they are used. This journal includes theoretical and practical works, relevant case studies, topical surveys, and research articles that address problems faced by telecommunication service providers, equipment manufacturers, enterprises, and policy makers in the areas of data communications and networking.

Individual Price:

Print: US \$285
E-Journal: US \$285
Print + E-Journal: US \$345

Institution Price:

Print: US \$800
Online Access: US \$800
Print + Online Access: US \$970

Topics Covered:

- Adoption and diffusion of networking technologies
- Business applications of telecommunications
- Business re-engineering issues associated with networking
- Cross-border network-based information systems
- Emerging networking trends
- Frameworks for wireless security
- Impact of the open source movement on business data communications
- Management of business data communications projects
- Management of telecommunications in organizations
- Mobility and m-commerce issues
- Network management contingency issues
- Organizational impact of e-commerce connectivity
- Outsourcing of networking and data communication services
- Policy-based network management systems
- Policy-based security systems
- Quality of service issues associated with networked systems
- Standards and network interoperability issues
- Strategic use of networking technologies
- Success factors of networked systems
- Usability of business data communication networks
- Use of distributed services (Web services/DCOM/CORBA) over wireless networks
- Effects of legislation and regulation on telecommunications
- Designing, deploying, and using networked systems in specialized sectors (i.e. health, education, and manufacturing)
- Security of interconnected systems (procedures, implementation, mechanisms, protocols, and compatibility)
- Telecommuting, remote access, and virtual private networks

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com/publish/resources prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:
Zoubir Mammeri, IJBDNCN@igi-global.com
