

Energy Optimization and Engineering (IJEQE)

ISSN: 2160-9500; EISSN: 2160-9543

Established 2012; Published Quarterly

Editor(s)-in-Chief: Pandian Vasant (Universiti Teknologi Petronas, Malaysia), Gerhard Weber (Middle East Technical University, Turkey) and Dieu Ngoc Vo (Ho Chi Minh City University of Technology, Vietnam)

The **International Journal of Energy Optimization and Engineering (IJEQE)** publishes global research in the areas of energy optimization and engineering. The journal provides relevant theoretical frameworks and the latest empirical research findings in the areas of energy systems and hybrid intelligent optimization. This interdisciplinary journal examines and encourages research within energy optimization and engineering fields, including novel meta-heuristics optimization techniques such as fuzzy logic, neural networks, evolutionary algorithms, mathematical programming, pattern search, particle swarm optimization, ant colony optimization, and hybrid optimization in a variety of engineering, science, business, and energy systems of real world practical application problems.

An official publication of

Individual Pricing

Print + Free E-Access: **\$275.00**

E-Access + Free Print: **\$275.00**

Institution Pricing

Print + Free E-Access: **\$765.00**

E-Access + Free Print: **\$765.00**

Topics Covered:

- Ant Colony Optimization
- Artificial bee colony
- Artificial immune systems
- Artificial Neural Networks
- Automatic computing
- Bacterial foraging
- Bioenergy
- Biological Computing
- Chaos optimization
- Cloud Computing
- Combinatorial optimization
- Computational Intelligence
- Continuous optimization
- Cultural algorithms
- Differential Evolution
- Direct search
- Distributed generation
- Energy economics
- Energy Efficiency
- Energy fuel procurement chain approaches
- Energy fuel supply chain approaches
- Energy Storage
- Evolutionary Computing
- Fuzzy Logic
- Genetic algorithms
- Granular computing
- Hybrid algorithms
- Innovative approaches for renewable supply chain engineering
- Integrated energy systems
- Intelligent computing
- Life cycle assessment of energy systems
- Local and global search
- Memetic algorithms
- Meta-heuristic methods
- Micro-grids and optimal management
- Natural computing
- Ocean thermal energy
- Oil and gas industrial production systems
- Particle Swarm Optimization
- Pattern search
- Production of biogas
- Renewable biofuel plants
- Simulated annealing
- Simulation and modeling
- Soft computing techniques
- Solar and geothermal
- Support vector machines
- Sustainability of energy systems
- Swarm Intelligence
- Tabu search and variable neighborhood search

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. INTERESTED AUTHORS MUST CONSULT THE JOURNAL'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS AT <http://www.igi-global.com/journals/guidelines-for-submission.aspx> PRIOR TO SUBMISSION. All article submissions will be forwarded to at least 3 members of the Editorial Review Board of the journal for double-blind, peer review. Final decision regarding acceptance/revision/rejection will be based on the reviews received from the reviewers.

All submissions and inquiries should be directed to the attention of:
Pandian Vasant, eic.ijeoe@gmail.com

All submissions must be forwarded electronically toeic.ijeoe@gmail.com

EDITOR-IN-CHIEF BIO

Pandian Vasant is an Executive Editor of Global Journal of Technology and Optimization and Editor-in-Chief of *International Journal of Energy Optimization and Engineering*. His main research interests are in the areas of Optimization Methods and Applications to Decision Making and Industrial Engineering, Fuzzy Optimization, Computational Intelligence, and Hybrid Soft Computing. Pandian Vasant has co-authored 200 research papers and articles in national journals, international journals, conference proceedings, conference paper presentations, and special issues as lead guest editor, lead guest editor for book chapters' project, conference abstracts, edited books, and book chapters. In 2009, Pandian Vasant was awarded top reviewer for the *Journal of Applied Soft Computing* (Elsevier). He has been Co-Editor for AIP Conference Proceedings of PCO (Power Control and Optimization) conferences from 2008 until 2013 and editorial board member of international journals in the area of Soft Computing, Hybrid Optimization, and Computer Applications. Google Scholar Citations: h-index is 17; i10-index is 28 (Citation Indices).

G.-W. Weber is a Professor at IAM, METU, Ankara, Turkey. His research is on OR, financial mathematics, optimization and control, life sciences, data mining, education and development; he is involved in the organization of scientific life internationally. He received his Diploma and Doctorate in mathematics, and economics / business administration, at RWTH Aachen, and his Habilitation at TU Darmstadt. He held Professorships by proxy at University of Cologne, and TU Chemnitz, Germany. At IAM, he is in the programs of Financial Mathematics, Actuarial Sciences and Scientific Computing and Assistant to the Director, and he is a member of four further graduate schools, institutes and departments of METU. Further, he has affiliations at the universities of Siegen, Ballarat, Aveiro, North Sumatra, and Malaysia University of Technology, and he is "Advisor to EURO Conferences".

Dieu Ngoc Vo received his B.Eng. and M.Eng. degrees in electrical engineering from Ho Chi Minh City University of Technology, Ho Chi Minh city, Vietnam in 1995 and 2000, respectively and his D.Eng. degree in Electric Power System Management from Asian Institute of Technology (AIT), Pathumthani, Thailand in 2007. He is currently Research Associate at Energy Field of Study, AIT and head of Department of Power Systems, Faculty of Electrical and Electronic Engineering, Ho Chi Minh City University of Technology, Ho Chi Minh city, Vietnam. His interests are applications of AI in power system optimization, power system operation and control, power system analysis, and power systems under deregulation.
