

Wearable Technology and Mobile Innovations for Next-Generation Education

Part of the Advances in Educational Technologies and Instructional Design (AETID) Book Series

Janet Holland (Emporia State University, USA)

Description:

Advances in technology continue to alter the ways in which we conduct our lives, from the private sphere to how we interact with others in public. As these innovations become more integrated into modern society, their applications become increasingly relevant in various facets of life.

Wearable Technology and Mobile Innovations for Next-Generation Education is an authoritative reference source on the development and implementation of wearables within learning and training environments, emphasizing the valuable resources offered by these advances.

Readers:

Focusing on technical considerations, lessons learned, and real-world examples, this book is ideally designed for instructors, researchers, upper-level students, and policy makers interested in the effectiveness of wearable applications.

ISBN: 9781522500698

Release Date: May, 2016
