Section 1: Curriculum Issues within the E-Learning Environment

Chapter 1
Implementing Educational Technologies: Capacity Building
Gregory Plumb, RMIT University, Australia

Chapter 2
Teaching of Fluid Mechanics in Engineering Course: A Student-Centered Blended Approach
Ataur Rahman, University of Western Sydney, Australia
Md Al-Amin, Monash University, Australia

Chapter 3
Blending Conventional Methods with Emerging Flight Simulation Technology as Tools for Effective Teaching and Learning Experiences in Aerospace Engineering
Noor A. Ahmed, University of New South Wales, Australia

Chapter 4
Enhancement of Student Learning for Effective Capstone Project Outcomes
Aaron S. Blicblau, Swinburne University of Technology, Australia
Jamal Naser, Swinburne University of Technology, Australia

Chapter 5
Module-Based Teaching of Mechanical Design
Alokesh Pramanik, Curtin University, Australia
M. Nazrul Islam, Curtin University, Australia

Chapter 6
Using Real World Applications as Technological Tools in Engineering Education
Sidney Shiu Hin Ho, Vocational Training Council, China

Chapter 7
Undergraduate and Postgraduate Education in Renewable Energy
Richard Corkish, University of New South Wales, Australia

Chapter 8
Control Systems: the Overarching Discipline
Roger La Brooy, RMIT University, Australia

Chapter 9
Automotive Engineering Education at the National University of Singapore
Shirish P. Patil, The National University of Singapore, Singapore

Chapter 10
Online Postgraduate Program Development
John P. T. Mo, RMIT University, Australia

Section 2: Discipline Specific Electronic and Online Tools for Learning

Chapter 11
Innovative Teaching Practice and Assessment with Technology Applications in International Biomedical Engineering Education

Jaakko Malmivuo, Aalto University, Finland
Asta Kybartaite, Lithuanian University of Health Science, Lithuania

Chapter 12
The Tablet PC: a Complete Teaching Studio
Matthew Joordens, Deakin University, Australia

Chapter 13
Strategies to Remove Barriers and Increase Motivation to Use the Tablet PC in Formative Assessment
Antony Dekkers, Central Queensland University, Australia
Prue Howard, Central Queensland University, Australia
Nadine Adams, Central Queensland University, Australia
Fae Martin, Central Queensland University, Australia

Chapter 14
Use of the Finite Element Method and Computational Fluid Dynamics in Motion Analysis of Complex Shapes, With Examples from Sports
Takeshi Asai, Tsukuba University, Japan

Chapter 15
The BIM Concept: The Role of the Engineering School
Alcínia Zita Sampaio, Technical University of Lisbon, Portugal

Section 3: Using Technology Tools to Enhance Student Learning and Student Engagement

Chapter 16
eLearning – Challenges and Opportunities
Firoz Alam, RMIT University, Australia
Roger G. Hadgraft, RMIT University, Australia
Quamrul Alam, Monash University, Australia

Chapter 17
Understanding Students’ Use of Online Learning Tools through Online Learning Readiness Assessment
Kriengsak Panuwatwanich, Griffith University, Australia
Rodney A. Stewart, Griffith University, Australia

Chapter 18
Evolving Use of Educational Technologies – Enhancing Lectures
Eliathamby Ambikairajah, University of New South Wales, Australia
Vidhyasaharan Sethu, University of New South Wales, Australia
Ray Eaton, University of New South Wales, Australia
Ming Sheng, University of New South Wales, Australia

Chapter 19
Assessment Practices using Online Tools in Undergraduate Programs
Alexandra Kootsookos, RMIT University, Australia

Chapter 20
The Importance of Collaboratory: Using Collaboration Software to Engage and Assess Students in Computer-screen-based Tutorials

George P. Banky, Swinburne University of Technology, Australia

Chapter 21
Technology Enhanced Laboratory Experiments in Learning and Teaching

Firoz Alam, RMIT University, Australia
Roger G. Hadgraft, RMIT University, Australia
Aleksandar Subic, RMIT University, Australia
