Myint Swe Khine (University of Bahrain, Kingdom of Bahrain) and Issa M. Saleh (University of Bahrain, Kingdom of Bahrain)

Approaches and Strategies in Next Generation Science Learning examines the challenges involved in the development of modern curriculum models, teaching strategies, and assessments in science education in order to prepare future students in the 21st century economies. This comprehensive collection of research brings together science educators, researchers and administrators interested in enhancing the teaching and learning of next generation science.

Topics Covered:

- Curriculum Innovations
- Evaluation and Assessment Issues
- Improving Science Education
- Modeling Pedagogies
- Next Generation Learning
- Next Generation Science Assessment
- Scientific Thinking
- Self-Regulated Learning

Print: US $175.00  |  Perpetual: US $265.00  |  Print + Perpetual: US $350.00

Pre-pub Discount:
Print: US $165.00 | Perpetual: US $250.00
* Pre-pub price is good through one month after publication date.

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Myint Swe Khine is Professor in the field of learning sciences and technology and Head of Graduate Programs and Research at the University of Bahrain. He received his Master degrees from the University of Southern California, Los Angeles, USA and University of Surrey, Guildford, UK; and Doctor of Education from Curtin University of Technology, Australia. He worked in Learning Sciences Technology Academic Group at Nanyang Technology University, Singapore for several years. He publishes widely in the academic journals and edited some books. Recent publications include Learning to Play: Exploring the Future of Education with Video Games (Peter Lang, New York, USA), Advances in Nature of Science Research: Concepts and Methodologies (Springer, the Netherlands, 2012) and Perspectives on Scientific Argumentation: Theory, Practice and Research (Springer, the Netherlands, 2012).
Section 1: Theoretical Foundation and Conceptual Frameworks

Chapter 1
Self-Regulated Learning as a Method to Develop Scientific Thinking
Burton Erin E. Peters (George Mason University, USA)

Chapter 2
Multiple Perspectives for the Study of Teaching
Salloum Sara (Long Island University – Brooklyn, USA)

Chapter 3
Teaching a Socially Controversial Scientific Subject:
Deniz Hasan (University of Nevada Las Vegas, USA)

Chapter 4
A Theoretical and Methodological Approach to Examine Young Learners’ Cognitive Engagement in Science Learning
Tsai Meng-Fang (Chung-Yuan Christian University, Taiwan)
Jang Syh-Jong (Chung-Yuan Christian University, Taiwan)

Section 2: Modeling, Simulation, and Games

Chapter 5
Argumentation and Modeling:
Clark Douglas B. (Vanderbilt University, USA)
Sengupta Pratim (Vanderbilt University, USA)

Chapter 6
Reification of Five Types of Modeling Pedagogies with Model-Based Inquiry (MBI) Modules for High School Science Classrooms
Campbell Todd (University of Massachusetts Dartmouth, USA)
Oh Phil Soo (Cyung-pjin National University of Education, Korea)
Neilton Drew (Logan High School, USA)

Chapter 7
Why Immersive, Interactive Simulation Belongs in the Pedagogical Toolkit of “Next Generation” Science:
Tutwiler M. Shane (Harvard University, USA)
Grotzer Tina (Harvard University, USA)

Chapter 8
Teachers and Teaching in Game-Based Learning Theory and Practice
Martinez-Garza Mario M. (Vanderbilt University, USA)
Clark Douglas B. (Vanderbilt University, USA)

Section 3: Curriculum Innovations

Chapter 9
Opening Both Eyes:
Clary Renee M. (Mississippi State University, USA)
Wandersee James H. (Louisiana State University, USA)

Chapter 10
Promoting the Physical Sciences among Middle School Urban Youth through Informal Learning Experiences
Kelly Angela M. (Stony Brook University, NY)

Chapter 11
Rooted in Teaching:
Gross Lisa A. (Appalachian State University, USA)
James Jey (Appalachian State University, USA)
Frauman Eric (Appalachian State University, USA)

Chapter 12
Analysis of Discourse Practices in Elementary Science Classrooms using Argument-Based Inquiry during Whole-Class Dialogue
Bennet Matthew J. (Indiana University Northwest, USA)
Yarker Morgan B. (University of Iowa, USA)
Hand Brian M. (University of Iowa, USA)
Norton-Meier Lori A. (University of Louisville, USA)

Section 4: Evaluation and Assessment Issues

Chapter 13
Next Generation Science Assessment:
Lyon Edward G. (Arizona State University, USA)

Chapter 14
A Tool for Analyzing Science Standards and Curricula for 21st Century Science Education
Dani Danielle E. (Ohio University, USA)
Salloum Sara (Long Island University, USA)
Khishfe Rola (American University of Beirut, Lebanon)
Saouma BouJaoude (American University of Beirut, Lebanon)

Chapter 15
Measuring and Facilitating Highly Effective Inquiry-Based Teaching and Learning in Science Classrooms
Marshall Jeff C. (Clemson University, USA)
